

# Dark Universe and our Body

B.Siva Reddy

**Abstract**—The universe inside out is the metaphysical phenomenon. In reality body is the gift from GOD.

**Index Terms**—Chakras, Dark Universe, Kundalini, Multidimensional Vibrations, Odia Language, Our Body & Sanskrit.

## 1. INTRODUCTION

Dark matter and dark energy can't be detected by heavy machineries. It is detected by subconscious mind. To achieve it we should follow awakening of kundalini energy through regular practice of mantra, tantra, yantra, yoga and meditation. After the completion of process we are able to see present, past and future through the Guru Chakra. Chakras are multidimensional vibrations from where 50 letters are come from sunyabrahma. Kundalini yoga is often identified as the most dangerous form of yoga because of the involvement of subtle energies. Sunya chakra is the void chakra connected to dark universe. We forget thysself through the process of kundalini yoga.

50 multidimensional vibrations are shown below in Figure 1. Odia language is the polished language like Sanskrit. 1008 interconnected vibrations formed by combination of theses letters. 14 multidimensional vibrations are from Sunya Chakra. Totally 64 dimensions in our body.

Dark matter does not mean so dark. Dark matter is cooling matter, where all things are going to end and certain vibrations are creating from dark matter. It occurs everywhere and has lowest frequency in the multiverse. Space storage is find in this location. Naturally brains are using this phenomenon. Scientists fails to detect subatomic universe in any big machines, but our brain won't. During sleep memories emerges into dark matter.

Body connect with the whole multiverse with this dark matter. It activate by certain  
Figure 1

vibrations or strings of mantras. Any equations are fail to describe this phenomenon or matter inside it. Black holes are the mine of dark matter and mother of parts of star conste-llations.

Any equations associated with energy are not applied to it. Dark energy is something i.e

the vibration from the dark matter and origin of everything.

Biosphere seen only in earth, because they are made by mantras. Perhaps aliens are seen from other worlds. And want to connect us with their technology. Dark energy is optimum technology to build something extraordinary things. Flowers are come from nothing before the plant germination. That are linked with certain vibration of that species. All are in certain vibrations. In other words dark energy is the mother of types of energy and matter.

All things are connected and include in the dark universe. Both the universe and emptiness inside them. Born of stars and demolition of that are within the dark universe. The gap between two or more universe is nothing (Dark universe also). Visible light and invisible light is everywhere which detected by modern machines. Electromagnetic waves penetrate through the dark universe.

By practice, you are able to see farthest of anything. Known universe detect by the radio signals and many known signals. Beyond that frequency, no one knows what exists. All detecting devices are within your brain and body. You lose yourself in modern world and lifestyle.

Big bangs are occurred from the dark matter. Star dust are made to create solar systems. Stars and black holes are included with dark universe. Genetic coding is best example of matter and energy like male and female. From initiation of big bang stars are also in male and female forms. White hole and black holes are another example. All things like gravitons, antimatter and types of sub atomic particle continue to generate more energy by converting matter and vice versa.

Creator uses this phenomenon to design the whole universe within the speed of time. So, destroyer destroys evil things. GOD's matter is dark universe. Dark universe is the storage of all the things.

## 2. THE BODY AND THE UNIVERSE

To develop spiritual elevation we should know more about the body. Star dust is come from Sadhaks, when they are being complete man from God. Dhuni is also sign for creation and demolition of the things. Entire cosmos create within quantum time and destroy in every fraction of second. Vibhuti (Destruction of Body) is the origin of Srusti (Creation of new body) of anew body. Everyday new cells are born and die in fraction of second. After creating Vibhuti we are safe from sunya chakra. Our body has the power to create anything by using materials like making engineless spacecrafts.

Man should keep away from eating Non-Veg. Because, the Shiva hidden in our body don't like non veg. Spiritual snake take blood from body to purify it clearly. Sometimes man go to space in mind and forget themselves in the negative effect on the body. The control over body and mind save us from danger.

## 3. WAY OF ENLIGHTENMENT

CERN didn't detect dark universe. Because it is made up of universe of subatomic particles. Our neurones and subconscious mind only detect dark universe. GOD create us from sunyabrahma. All things are come from nothing and go to nothing-oinfinto. Zero to infinity and infinity to zero/nothing is called as oinfinto. The practitioners achieve the the power brain to write and do remarkable things in outstanding way. We read only 4D. But there are 64 dimensions are there in our body. Whole nature related to these dimensions.

Students from age 4 (years) are capable to do meditation and get Enlightenment. We all are known all things at the womb. So, we are not crying inside it. When we are come outside all things are totally forgotten and start to worry. We search for ourselves in our surroundings. When we go to school we start to learn alphabets and sentences. Alphabets with right pronunciation give good results. Who Am I?

Answer for 'Who Am I?' is simply I am soul. To know the answer practically go through different phases of meditation. The Phases are described below in brief. All things are simply start from meditation. Subconscious mind uses certain sparks to store the memory of daily

activities. If we use it 100% we get extraordinary things in real life. Our body has the power like a super computer. Sometimes supercomputers are fail to detect the time. Our brain detect past, present & future time.

#### 4. MEDITATION

Simply sitting in lotus posture for long time upto 2-3 hours make the base strong. Posture make relax for long time. After some time you feel light weight. Breath exercises help to improve the span of meditation. Seven chakras are going to activate after all thoughts are coming to nothing. It take a long time to practice. Seven chakras are from root to top are Muladhara Chakra (Root Chakra), Swadhishtana Chakra (Sacral Chakra), Manipura Chakra (Solar Plexus Chakra), Anahata Chakra (Heart Chakra), Vishudda Chakra (Throat Chakra), Ajna Chakra (Third Eye Chakra), Sahasrara(Crown Chakra) and Sunya Chakra(Void Chakra). Void Chakra is secret chakra hidden in cosmos.

In Muladhara Chakra, Dormant Kundalini is often said to be resting here, wrapped three and a half, or seven or twelve times. Sometimes she is wrapped around the black Svayambhu linga, the lowest of three obstructions to her full rising (also known as knots or granthis).It is symbolised as a four-petaled lotus with a yellow square at its center representing the element of earth. The seed syllable is Lam for the earth element (pronounced lum),. All sounds, words and mantras in their dormant form rest in the muladhara chakra, where Ganesha resides, while the Shakti is Dakini. The associated animal is the elephant. It has 4 dimensions(Petals).

Svadhishthana is represented with a lotus within which is a crescent moon symbolizing the water element. The seed mantra in its center is Vam representing water. The presiding deity is Brahma, with the Shakti being Rakini (or Chakini). In esoteric Buddhism, it is called Nirmana, the petal lotus of "Creation" and corresponding to the first state of Four Noble Truths. It has 6 dimensions(Petals).

For the Nath yogi meditation system, this is described as the Madhyama-Shakti or the intermediate stage of self-discovery. Manipura chakra is represented as an upward pointing triangle representing fire in the middle of a lotus with ten petals. The seed syllable for fire is at its center Ram. The presiding deity is Braddha Rudra, with Lakini as the Shakti. It has 10 dimensions(Petals).

Within it is a yantra of two intersecting triangles, forming a hexagram, symbolising a union of the male and female as well as being the esoteric symbol for the element of air (vayu). In Anahata Chakra the seed mantra of air, Yam, is at its centre. The presiding deity is Ishana Rudra Shiva, and the Shakti is Kakini. In esoteric Buddhism, this Chakra is called Dharma and is generally considered to be the petal lotus of "Essential nature" and corresponding to the second state of Four Noble Truths. It has 12 dimensions(Petals).

The Vishuddha is iconographically represented with 16 dimensions (petals) covered with the sixteen Sanskrit vowels. It is associated with the element of space (akasha) and has the seed syllable of the space element Ham at its centre. The residing deity is Panchavakra shiva, with 5 heads and 4 arms, and the Shakti is Shakini. In esoteric Buddhism, it is called Sambhoga and is generally considered to be the petal lotus of "Enjoyment" corresponding to the third state of Four Noble Truths.

Ajna Chakra or Guru chakra or third-eye chakra, the subtle center of energy, where the tantra guru touches the seeker during the initiation ritual (saktipata). He or she commands the awakened kundalini to pass through this centre. It has 2 dimensions(Petals).

Sahasrara chakra is highest spiritual centre, pure consciousness, containing neither object nor subject. When the feminine Kundalini Shakti rises to this point, it unites with the masculine Shiva, giving self-realisation and samadhi. In esoteric Buddhism, it is called Mahasukha, the petal lotus of "Great Bliss" corresponding to the fourth state of Four Noble Truths. It has 1008 dimensions (Petals).

## 5. CONCLUSION

We should learn in right formatted letters and sounds to achieve good stuff. All things have certain vibrations and related to universal language i.e Sanskrit (language of Gods/ Things around us). We are forget the power of ourselves and research outer environment and get insufficient data.

After completion of schooling we are capable of to do extraordinary things-Best designing of engineering products, knowing everything in microscopic and macroscopic level. A doctor cure disease by simply chanting mantras/ certain vibrations. Sunya Chakra give us that vibrations in your own language.

Mantras are come from nothing, Sunya Chakra to subconscious brain after completion of enlightenment. We create everything by using these vibrations. You are capacity to creating anything from nothing by using void chakra.

Graduate students write their own book to design anything. Void chakra is related to dark matter and dark energy. Cosmological bodies are go to nothing in certain time. You will create a big bang by uttering certain mantras and vibrations related to that object.

Artificial Intelligence give the language to machines to do work in best way. Only Intelligence give you the power to do anything. Machine learning is the fraction of your brain. You will experience to do anything like gods do. It is not fictional movie. But, the concept is same as this article provide you the way of thinking capability.

After all we got the idea about immortal soul and it's presence in our body.
