

## AUTHOR'S SUBMISSION

(Scientific article on super scientist of climate control)

**M.Arulmani, B.E.**  
*(Engineer)*

**V.R.Hema Latha, M.A., M.Sc., M.Phil.**  
*(Biologist)*

Sir,

A research oriented scientific article on global warming and climate change issue is herewith enclosed for kind perusal and publish for further research for the **benefit of global population.**

It is focused that the deviation (**misalignment**) in **magnetic axis** connecting earth and moon shall be the main cause for the present day global warming and severe climate change. The prehistoric human population (called as super scientist) have already discovered and conscious about this phenomena of existence of strong magnetic field axis connecting moon and earth. In the expanding universe as **moon is going away** from earth the misalignment in magnetic axis gradually takes place and has considerable effect which results in severe temperature rise and climate change in modern period.

In the **early universe** before evolving planets and other matters due to electro magnetic radiation the magnetic axis was very strong and **perfectly aligned**. The permeability, permittivity, refractive index of the medium was considered to be **very high**, which results in the surface of the moon was highly influenced with protons and surface of earth was highly influenced with electrons and upper part of space was highly influenced with photons. During the course of **expanding universe** the permeability, permittivity, refractive index of the medium are gradually **decreased** due to situation of the moon is traveling away from the magnetic axis.

It is speculated that excess **CO<sub>2</sub>** is naturally produced due to **depletion of ozone layer** rather than human act due to **consistent deviation in Magnetic axis**, and low level permeability of medium. In other words it can be said that the consistent low permeability environment is constantly destroying the ozone layer and there by constantly producing **carbon-di-oxide and water vapour**. If the situation continues to exist at certain point the **CO<sub>2</sub>** level will be very **maximum** and oxygen level will be very **minimum** and at this stage modern human with oxygen breath may be gradually become **extinct** due to lack of oxygen. It is speculated that the low permeability level increased the oxygen level but at one stage oxygen level gets decreased by increasing the **CO<sub>2</sub>** level enormously. Further due to low permittivity of the medium there may be the chances for reaching more lightning strokes on the earth and due to very low refractive index more electro magnetic rays shall reach earth and there by the temperature will be increasing to the extra ordinary level beyond human survival.

It is hypothesized by the author that because of the situation the **natural frequency** of oscillation of earth (Earth Wobble) gradually **increases**, which results in **evolution of various organisms**. It is speculated that the prehistoric human was the **first evolved** organism having **three chromosome**. At the time of evolution of first human, the space was full of **ozone** influence and the prehistoric human could subsist with **ozone breathe** and lived in **Mars**. When the magnetic axis gradually gets deviated the ozone layer might be reduced gradually which paved way for **evolution of Oxygen**. At particular point, due to reduction of Ozone layer level become more the life of prehistoric human population might be gradually become **extinct** and the **modern human with 46 chromosome** might have been evolved and switch over to oxygen environment subsists with **Oxygen breathe**. It is hypothesized by the author that due to further gradual decrease in the permeability of medium the carbon Nitrogen, Ozone, Characteristic cycle (CNO) probably have strong ozone level. It is speculated that at a particular point of very low permeability of space the rate of **CO<sub>2</sub>** level will increase tremendously with high rate of decrease of ozone level and oxygen level.

It is hypothesized by author that due to further gradual decrease in the permeability of medium, the carbon, nitrogen, ozone, characteristics cycle (CNO) probably have strong impact on increased **CO<sub>2</sub>** level and decreased ozone level. It is speculated that at a particular point of very low permeability of space the rate of **CO<sub>2</sub>** level will increase enormously with high rate of decrease of ozone level and oxygen level.

It is hypothesized by the author that at this **junction** if the magnetic, i.e. axis is not restored to the **original position**, there may be a possibility of evolving **new human** with higher chromosome level who may be subsisting with **hydrogen breathe by 2100AD**.

From the case study of **SHUMANN RESONANCE** and **Mayan Theory** the **zero point** of the earth could occur by **2013AD**. But it is speculated by the author that the zero point of earth could occur probably by **3000AD** when all the magnetic field will be absolutely lost and the **magnetic axis** may likely to be **broken down**.

# THE SUPER SCIENTIST OF CLIMATE CONTROL

## Foreward

The term **Science** is concerned with knowledge based on experimentation and **empirical** facts about the physical, chemical, mathematical properties and characteristics of **Nature**. The term **Super Natural** is concerned with something which can not be defined by **scientific laws**. The term **Super shall mean something** better than Normal. If so, is there any difference between **science** and **superscience?.... Scientist and Superscientist?....**

It is focused that there is difference between science and superscience; Scientist and superscientist. It is focused by the author that all the matters and life organisms are **evolved** due to existence of **Electro-magnetic radiation (EMR)**. Hence all the scientific laws shall be considered evolved from Electromagnetic influence. Author considers the knowledge about Electromagnetic radiation as **super science** and all laws about physical, chemical and Mathematical properties of matter and life shall mean as **Sub Science** to the superscience. Sub Science may be referred to **awareness**; whereas Superscience may be referred to **Consciousness** about the **Nature**.

Author focus the **Prehistoric human** who were expert in Electromagnetic theory shall be considered as **Superscientist**. The **modern human** who are practicing with Electromagnetic radiation shall mean **Scientist**. In other words, Prehistoric Scientist shall mean having **super wisdom** about Electromagnetic theory and Modern Scientist shall mean having **moderate wisdom** about Electromagnetic radiation.

The author focus the following parameters within the scope of **definition of superscientists**.

- i) Superscientists are prehistoric human having **three chromosome** (Star human).
- ii) Superscientists are Prehistoric human who lived in **MARS** and subsists with **OZONE** breath.

- iii) Superscientists are Prehistoric human who were expert in Astronomical Science and defined the philosophy of **STAR**.
- iv) Superscientists considered Sun, Earth, Moon are the base of Universe rotate on its axis in a fixed position but never revolve any planet in the orbit. Modern Scientists propose theory that Sun, Earth, Moon also revolve in the orbit.
- v) Superscientists are Prehistoric human who **discovered** the relative position of **Sun, Earth** and **Moon** in the Solar system.
- vi) Superscientists are Prehistoric human who were expert in high level language and formulated all laws related to science in **Code Form**.
- vii) Superscientists are Prehistoric human who were expert in global warming and **climate control issues**.
- viii) Superscientists are prehistoric human whose **super wisdom** is degraded to **moderate wisdom** when gained **46** chromosome during the course of **evolution** and become **Modern Scientists**.

Author focus the following salient **conflicts** among **superscientists and modern scientists**.

- i) Superscientists discovered that there is only **one star** in the Universe. Modern scientists focus that there are **Millions** of stars in the universe.
- ii) Superscientists considered and formulated that Sun, Earth and Moon are **integral** part within the definition of **Star**. Modern scientist considers **Sun** alone is a star.
- iii) Superscientists formulated the exact relative position of Sun, Earth, Moon as forming as **Isoscece Triangle**. Modern Scientists do not have clear **conscious** about relative position of Sun, Earth and Moon and considering them as independent body and revolving in the **Orbit**.
- iv) Superscientists considered Sun, Earth, Moon are the base of universe rotate on its axis in a fixed position but never revolve any planet in the orbit. Modern scientists propose theory that Sun, Earth, Moon also revolve in the orbit.
- v) Superscientists formulated Sun, Earth, Moon are **three-in-one central core** of solar system. Modern scientists consider **SUN** as the central core of solar system.
- vi) Superscientists are focused the **shape** of cosmo universe as a **closed Tripod** structure with Triangular base. Modern scientists propose **so many theories** about the shape of cosmo Universe.
- vii) Superscientists were exactly diagnosing the global warming and climate changes issues and **tackled** the problem successfully. Hence they lived for **long span of life** and highly

immune to **lightning** strokes. Modern scientists could not diagonalise properly and proposing **Green energy, Clean Energy, Green Technology**, as alternative medicine for sustainability of life. Because of **wrong** medicine their immunity system is lost and **life span** is also getting reduced. **Mosquitoes** could not touch the superscientists. Whereas mosquitoes are playing with modern scientists who are afraid of Mosquitoes and providing more **budget** for **Mosquitoes Management**.

- viii) Superscientists have already discovered the **magnetic axis** connecting Earth and Moon play major role in **global warming and climatic issues**. Modern scientists do not have conscious about the **alignment of magnetic axis**. Hence the earth suffers from severe **Magnetic syndrome** and causing severe climatic change problem due to **shift of moon**.
- ix) Superscientists considered climatic issues as a **Physical** and **Mathematical** phenomena. Modern scientists consider the climatic issue as **chemical phenomena**.
- x) Superscientists lived in **MARS** and subsisted with **ozone breath**. Modern scientists are pushed down to earth and subsisting with **oxygen** breath.
- xi) Superscientists were **anti-oxidant** and highly immune to **lightning and cancer**. Modern scientists are **oxidant** and lost immune to lightning and **cancer attack**.
- xii) Superscientists focused that the source Electromagnetic radiation are **Neutrinos**. Modern scientists believe that the source of EMR is **SUN** or **Clouds**.
- xiii) Superscientists formulated that the entire cosmo universe contains only **three regions**. Modern scientists propose theory of thousands of **galaxies**.
- xiv) Superscientists formulated Permeability, permittivity, Refractive index are the **three fundamental scientific constants** in estimating characteristics of universe. Modern scientists believe that **pressure, temperature, density** are the prime constants and other parameters such as Gravity, relativity, force, etc. and formulating different theories..
- xv) Modern scientists call the superscientists as **Apes**. Superscientists just **smile** on them.
- xvi) The law of **superscience** speculates the **misalignment** in magnetic axis be the cause of present day climate change. The modern science believes excess **CO<sub>2</sub>** deposition be the cause for climate change.
- xvii) Superscientists called **liquid ozone** as **ozone water**. Modern scientists call liquid ozone as **OCEAN** water. Ocean water on the earth is nothing but condensation of ozone at a particular point of magnetic intensity.
- xviii) Superscientists called **ozone** enriched energy as **Green Energy**. Modern scientists call **oxygen** enriched energy as Green Energy.

- xix) Super science focus the need of restoration of magnetic axis for **sustainability** of life. Modern science focus Green Energy for sustainability of life.
- xx) The law of superscience speculates that the increased magnetic misalignment may affect the human heart beat level which may shift to around **100** from standard beat of **72** per minute. Modern Science speculates that increased **CO<sub>2</sub> level** may affect the human survival which is a secondary issue. CO<sub>2</sub> is considered increasing by reducing the ozone layer automatically due to consistent low permeability of space medium rather than human Induced act.
- xxi) Superscientists observed varying characteristics of universe with term as **Magnetic Syndrome**. Modern scientists coin the term as **Expanding Universe**.
- xxii) Superscientists while living in **MARS** adopted very high level communication with only three tiny alphabet in **code form**. Modern scientists developed many symbols, characters in formulating the scientific laws. Modern scientists might have developed **Morse Code** from the philosophy of prehistoric **Mars Code**.
- xxiii) Superscientists focused the three fundamental neutrinos **Photon, Electron, Proton** which are responsible for evolution of atoms, molecule and other matter like planets, Asteroids, Ocean, rocks, soils, etc. Modern scientists are not so conscious about these associations of these three fundamental Neutrinos, which are closely associated with Sun, Earth and Moon.
- xxiv) Superscientists considers **carbon, nitrogen, ozone** ion are the three fundamental species to Hydrogen ion. All other chemical elements shall be considered as the **subspecies** to carbon, nitrogen and ozone. Modern scientists do not have conscious about the clear cut **lineage of** evolution of fundamental elements carbon, nitrogen, and ozone.

## Introduction

**Global Warming** and climate change issue is a present day serious concern and threat to the global populations. Many scientists believe and focus that the atmospheric temperature of earth consistently increases especially in the past **100 years** after industrial **revolution**. It is believed that the reason is due to **Greenhouse gas effect** and excess deposition of **CO<sub>2</sub>** due to increased usage of **fossil** fuel such as coal, coke, petroleum, etc. Hence, Modern Scientists focus for switching over to **Green energy, Green Technology**, such as effective use of naturally available energy resources such as **solar power, wind power, ocean tidal power**, etc. and implementation of **energy efficiency products**.

It is the speculation of the author that the modern scientists probably could not correctly diagnose what is the exact reason for the temperature rise of earth. Without knowing the exact reason alternative medicines are focused for usage of alternative form of **renewable energy sources**. Some scientists focus

that the global warming is due to **depletion of ozone layer** in the atmosphere and formation of **ozone hole** in the **Arctic region**.

Being a life threatening issue inter-governmental panel on climate change (**IPCC**) was created by United Nations Environment Programme (UNEP) and World Meteorological Organisation to assess the scientific knowledge on global warming. IPCC concluded in 1990 that there was broad International Consensus that climate change was **Human-induced**. Every occasion global level climate conference is going on. Recently 15<sup>th</sup> conference at Copenhagen was met in **December 2009** what is the outcome? **Are they able to control the temperature of earth?**

The 1995 **Nobel Prize** Winner **Dr. Molina** has also emphasized in the recently in **2012** Conference at Philadelphia that there is no “**absolute certainty**” that global warming is causing **extreme weather events**.

In the Modern time it is further focused that not only the problem of global temperature rise but also so many other problems such as unpredicted **cyclone, earthquake, volcanic activity**, various disease like **dengue fever, Bird fever**, fast growth rate of **cancer**, mental **depression**, etc. Are all the causes due to excess deposition of **CO<sub>2</sub>** problem? No.... No..... It is something concerned with **genetic deviation of universe**. In other words, it can be said that it is something concerned with problem in the **structural and functional** part of universe rather than **chemical reason** induced by human act.

It is speculated by the author that the **prehistoric human** (Super scientist) probably correctly diagnosed the characteristics of **star** of universe and taken **preventive measures** against serious natural calamity and disaster. During the course of time when the prehistoric human populations have been **extinct**, all the prehistoric Astronomical, scientific laws, etc., formulated by them in **code form** might also have been destroyed and lost.

Author considers the Universe, as a **family** in which **child** is going away without obeying and hence Father and Mother are **heated** up. In Astronomical term, the Solar system is considered as a universal family and the **Moon** is considered as going away from **Earth** and hence the **Earth gets warmed** which is understood as **GLOBAL WARMING**. It is hypothesized by the author that the Prehistoric human are well versed with astronomy and other scientific technology and in fact they might be considered as **Superscientists** (having different **genetic** structure) compared to modern time scientists.

Further it is focused that in the existing so called **Solar System**, the earth shall be considered as **evolving** on its axis rather than **revolving** on its axis. It is speculated that the natural frequency of oscillation of Earth **consistently increases** on its axis of rotation and hence it shall be termed as **evolving** of earth rather than **revolving** of Earth on its axis.

<p style="text-align: center;"><b>Prehistoric “three dot” formula related to Star</b></p> <p>➤ <b>Three dot is considered as relative position” of Sun, Earth, Moon in prehistoric “Astronomy”.</b></p> 	<p style="text-align: center;"><b>Three dot alphabet usage in global languages.</b></p> <p><b>The three dot Prehistoric Tamil code is considered in usage in various global languages.</b></p> <ul style="list-style-type: none"><li>➤ <b>Ancient Hebrew language</b></li><li>➤ <b>Ancient Arab language</b></li><li>➤ <b>Ancient Persian language</b></li><li>➤ <b>Ancient Sanskrit language (Brahmi)</b></li></ul>
---	--

It is focused that the effect of continual **Microbial** increase in natural frequency of Earth could have considerable effect only during Modern Period and might be **very feable** in prehistoric time.

What is the shape of universe?... What was the first life originated?... What is the Chromosome number of first organism?... The first organism evolved from matter or antimatter?... oh... still there is a mystery even in 21st Century about the exact shape of Universe, the Origin of first life. There are so many **super stars** on the earth now. If so who was the **FIRST SUPER STAR?**

It is hypothesized by the author that the **prehistoric human** who was spontaneously evolved by **electro magnetic radiation** from the dark flame (Cosmo) and shall be called the first super star having **THREE CHROMOSOME** and he was much senior to **AMOEBIA** and lived in **MARS**. It is speculated that the prehistoric human formulated the relative position of Sun, Earth, Moon in the Universe in prehistoric code with **THREE TINY DOTS**. It is hypothesized by the author that the three tiny dots shall not be a mere fiction and in fact author considers as a **PREHISTORIC DISCOVERY** about the **real** relative position of Sun, Earth, Moon in the Cosmo universe. Further it is focused that the Sun, Earth, Moon shall not be considered as independent space object but shall be considered as an integral part of **THREE-IN-ONE** Star of the whole cosmo universe and shall be considered as the **central core** of solar system.

## **Narration**

The main focus of this article / book is related to **Origin of Life** and matter due to **Electro-magnetic radiation**. It is speculated that the electro magnetic radiation evolved from **neutrinos** and **dark matters** might be responsible for evolution of all Prehistoric human, planet, asteroid, and other organisms. It is focused that the Evolution of Various Organisms is due to variation and increase in **natural frequency** of oscillation of Earth (**Heart beat**). It is hypothesised that the **lineage** of Evolution of Organism Shall be identified according to the **Chromosome level of organism** and it is speculated that the increase in Chromosome level is closely associated with gradual increase in natural frequency of oscillation of Earth. It is focused that the variation in natural frequency of oscillation of earth shall be very well understood from the theory of **SCHUMANN RESONANCE**. It is hypothesized by the author that the **earth heart beat** is closely associated with **Human Heart Beat**. Schumann’s Resonance theory focus the earth heart beat is consistently increasing and speculated that the **Zero Point** of earth may occur by **2013 AD**. It is speculated

that the Prehistoric human might be having **standard heart beat** of **60** per minute as against **72** in Modern Human.

It is hypothesized that the whole cosmo universe has only one Sun, one Earth, one Moon. Further in the existing **solar system** Sun, Earth, Moon shall be considered as integral part and forming only **SINGLE STAR** in the whole Universe, which was already formulated in **PREHISTORIC TAMIL CODE IN THREE TINY DOTS**. Three tiny dots shall mean the relative position of **Sun, Earth** and **Moon** in the cosmo universe. It is hypothesized that Sun, Earth, Moon acts as a base of universe and revolve on its axis in a fixed position and not revolving any planet. Various seasonal climate cycle, Moon phases, Lunar, eclipse, Solar eclipse occurrence may be due to relative position of outer core of Sun, Earth and Moon. Further it is speculated that other planets such as Mars, Jupiter, Comets, Asteroids, etc., might also be rotating on its axis and not revolving and stationary in various layers of universe.

In the expanding Universe it is speculated that **Moon** is going away from Earth, which results in increase in natural frequency of oscillation of Earth due to **reduction** in intensity of **magnetic flux** along connecting Moon and Earth. As per **prehistoric law of Tamil code** the Earth and Moon shall be considered as **magnet bar** in which moon shall be considered as **North pole**, Earth shall be considered as **South pole** and Sun is considered as located above at **mid point** and **vertical** to the **magnetic bar**.

It is hypothesized that the present day alarming of **GLOBAL WARMING** may be due to **asymmetry** in the relative position of **SUN, EARTH, MOON** compared to prehistoric time which was **symmetric** in those period rather than increase in **carbon di oxide** level in the atmosphere.

## Modern Time Position of Star

- In modern time the relative position of Sun, Earth, Moon is altered due to deviation. Moon going away from Sun. Which leads to asymmetry in isosceles Triangle

It is speculated that the asymmetry and **misalignment** in magnetic axis connecting Earth and Moon may be the reason for rise in temperature of earth in the atmosphere above earth and thereby increase in natural frequency of oscillation of earth for **severe climatic change**. Case study shows that the magnetic field of earth is tilted by 11 degree. Further it is focused that the earth axis was deviated by 23.4°. Astronomers also confirmed that Moon is moving away from earth **3.8 cm per year**.

Further it is hypothesized that from the law of prehistoric Tamil code, the Sun, Earth, Moon are **not** really **REVOLVING IN THE ORBIT**, but they are rotating only **ON ITS AXIS** in stationary position. Various cycles of climatic and environmental condition Solar, Lunar Eclipses Moon Phases, etc., may be due to relative position of outer core of Sun, Earth, Moon due to electromagnetic effect. It is also hypothesized that the **INNER CORE OF THE SUN** also has **microbial** rotation on its axis which makes variation in unpredicted environment condition such as unexpected **earth quake**, unexpected **volcanic activity**, unexpected new disease such as **dengue fever**, **bird fever** and other fast growth of **cancer** in the modern time. Further it is speculated that the inner core of Sun may be completing **one cycle by 3000 A.D.**

It is focused that the first life originated was **THREE CHROMOSOME PREHISTORIC HUMAN** and whose population might be living in **MARS** due to different genetic structure and subsisting with **OZONE** breath. During the course of evolution of expanding Universe the **MODERN HUMAN** with 46 chromosome might have evolved and subsisting with **OXYGEN** breath. Hence, it is speculated that the oxygen might be evolved from the prehistoric ozone environment in much later period and in fact oxygen shall be considered as **SPECIES** to ozone. Further the prehistoric human might be having **GREEN** or **BLUE** colour blood due to ozone breath and subsequently the colour of the blood might be changed to **RED** colour due to oxygen breath in the modern time. It is focused by the Author that the first life originated might be prehistoric human having only three chromosome and much senior to **AMOEBIA** having **12** chromosome. Further, the prehistoric human might have derived three chromosome initially from the **star** i.e. Sun, Earth, Moon. He shall also be called as **Star Human**. It is focused that the Medical Term **TRISOMY** is considered as

chromosome abnormality with formation of additional chromosome (say 47 instead of 46) making chromosome level in **odd** number may be due to **genetic** reflection of **three chromosome** of Prehistoric human in Modern time.

It is focused by author that prehistoric human (**Akkie, Akkilan population**) while living in **MARS** region might be well versed in advancement in language, scientific technology, astronomy, mathematical science, evolutionary science etc and formulated the prehistoric **scientific laws** in **code form**. It is hypothesized that during that period they might have formulated the relative position of Sun, Earth, Moon in **three dot code form**. Further they might have estimated that **total chromosome** of prehistoric human as three numbers and formulated in code form in **three tiny dots**.

It is speculated by the author that in modern communication, the method of communication such as **Braille code, Morse Code, Binary Code, American standard computer code** etc might have been derived from the philosophy of **prehistoric Tamil code form**.

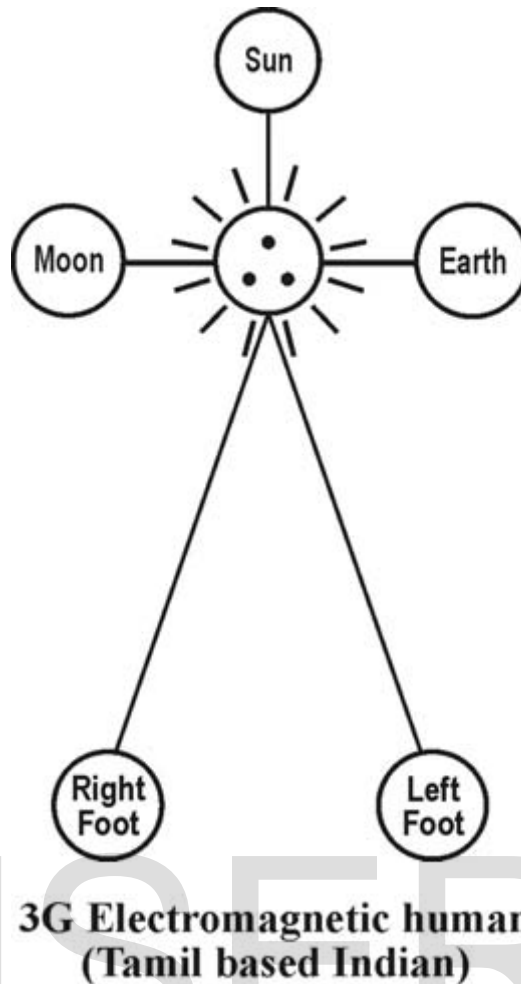

In modern science (Quantum Physics) still there is **mystery** exists about what is the shape of Universe?. The scientists are not able to conclude where from the huge radiant energy comes? It is hypothesized that the prehistoric human population already formulated that entire cosmo universe contains **THREE VACUUM** region of different level and formulated the Universe in code form with **three tiny dots**.

Further, it is hypothesized by the author that the whole cosmo universe could derive huge radiant energy from three fundamental **TAMIL NEUTRINOS** (so called **Aether** energy in modern physics). Author hypothetically call these three fundamental Tamil Neutrinos as (i) **A** – Neutrino (ii) **K** - Neutrino (iii) **J** – Neutrino. A - Stands for **photon**, K – Stands for **Electron**, J – Stands for **Proton**.

It is speculated that the **Aether** energy shall be considered as the central part of **Free radiant energy source** and three Neutrinos shall be considered as three fundamental **radiant charged particles** and shall also be called as **GODLY** Particles in **Astrophysics**.

It is speculated that the **MARS** planet cannot support currently the life of modern human with **46** chromosome and present attempt being made by **NASA** for making tour to MARS may be a useless attempt.

Can we see the prehistoric human who lived in **MARS?** How he looks like?....

Further it is focused by the author that not only MARS Planet, all other planets, Asteroids, Atmospheric gases, Earth resources like Ocean, Soil, Rock, Coke, Coal, natural gas, crude oil, etc shall be considered as the **byproduct** of electromagnetic equilibrium in the evolution process of early universe. It is hypothesized by the author that even **HUMAN BLOOD, URINE** shall also be considered as the **byproduct** of electromagnetic equilibrium takes place **every day** in human body.

Further it is hypothesized by the author that during the course of evolution of organisms, the **48** chromosome organism might be evolved at much later period after evolution of 46 chromosome organism. The **Apes** family may be having close **genetic** characteristics due to close proximity of chromosome level with **46** chromosome (**modern human**). It is hypothesized by the author that **Darwin Sir** evolution theory is related to very far below in the **lineage** region of chromosome **build up** process of organisms.

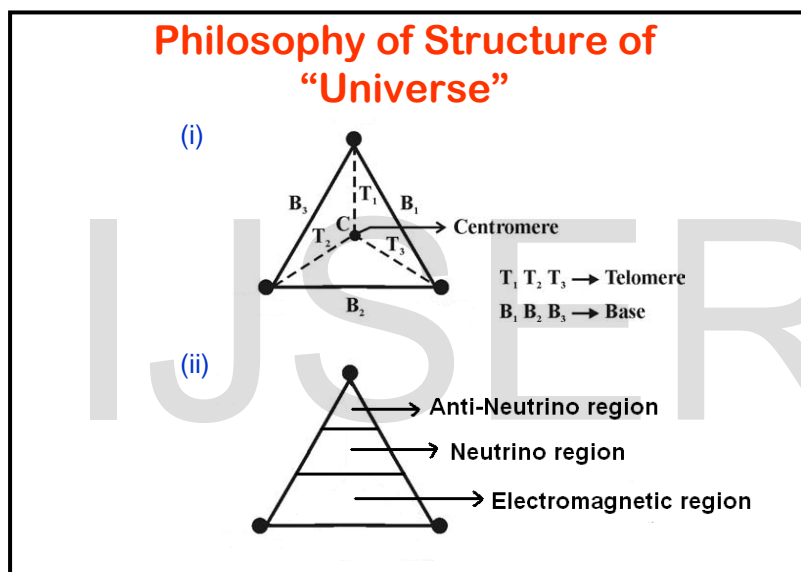

**Adam has three chromosome?.... Adam lived in MARS?....  
If so HEAVENLY FATHER is Tamil based?....**

Whether Prehistoric human population still exists? Or Died?

New scientific theory (**Biocentrism**) suggests that **death** is not the terminal event. Further it is the **axioms** of science that **Energy Never Dies**. It can neither be created nor destroyed. But does this energy transcend from one world to another. If so where the **energy** of Prehistoric human gone?

The Prehistoric tamil law already formulated that the whole cosmo universe has only **three regions of vacuum** and it was formulated with **three tiny dots**. The bottom most region shall be considered as **Material Universe** where all matters including planets exist. The other two **upper regions** shall be considered as containing Dark radiation consists full of **Neutrinos** and **anti-neutrinos** derived from **Dark Flame** (Cosmo).

Can we see the shape of universe? It is hypothesized by the author the shape of universe shall be considered as **Pyramid** like closed structure with **triangular base**, i.e. the star consists of Sun, Earth, Moon shall be considered as base of universe.

It is hypothesized by the author that all material form of organisms such as human, animals; plants, **after death** may rise upto the **upper region** of vacuum (Dematerialised) and still exists with **Dark Flame** of Universe. It is focused by the author that the dematerialized organisms **stays** in the upper region of vacuum region of universe as **charged particles** in the form of **Photon, Electron, Proton** (Neutrinos) which may again get **rebirth (incarnation)** forming electromagnetic radiation to evolve new organisms in **cyclic manner** in the expanding universe till **end of universe**. It is focused that thousands of twinkling objects in the sky shall be considered as the Pre-ancestors available in the form of charged particles (GOLDLY Particles).

It is further focused by the author that the existence of whole cosmo universe shall be considered as a **Single Global Tamil Family** and it was formulated by Prehistoric Tamil Code with **three tiny dots**. The three tiny dot shall mean **Father, Mother** and **Child**. **Universe** shall mean **Single Global Tamil Family**.

**What is the cause of Global Warming?**

**What is the remedial action for climate Change?**

(Author's hypothetical narration)

Author considers the event of global warming and climate change as a mathematical and physical phenomena rather than **chemical phenomena**. More precisely it shall be referred as **Earth Magnetic Syndrome** rather than excess **CO<sub>2</sub>** deposit in the atmosphere. It is hypothesized by the author that there is a **misalignment** in the **Magnetic axis** connecting both **Earth** and **Moon**. The misalignment in magnetic axis which results in reduction of magnetic intensity shall be termed as **Earth magnetic syndrome**.

In the Prehistoric time this Magnetic axis was **perfectly aligned** and the magnetic axis was exactly perpendicular to the **SUN**. As Moon is going away from earth, the magnetic axis is **misaligned** and hence global warming and **climate change** takes place.

It is the challenging time for the **global scientists** to find out solution how to stop the the **moon** from going away and bring back to the **home**. Because of the misalignment in axis and considerable **reduction** in **Ozone level** in the atmosphere. More reduction in ozone level shall mean more formation of **Oxygen** and **Carbondioxide**. It is speculated that excess **CO<sub>2</sub>** is naturally produced due to depletion of ozone layer rather than Human induced act.

It is speculated by the author that if the **Magnetic syndrome** of earth is not solved there is a possibility of next human evolution with **higher chromosome level** with modified genetic structure to subsist with **Hydrogen environment breath** and may be having new blood group such as **K-group, J-group, G-Group, etc.** After evolution of new human, the 46 chromosome human shall be considered as **FOSSIL**.

It is focused that the entire **material universe** was evolved due to **Electromagnetic radiation**. In electromagnetic theory there are three fundamental Parameters have to be considered are involved (i) **Permeability**, (ii) **Permittivity**, (ii) **Refractive index** of medium which are related with **Magnetic, Electric** and **Optic** Characteristics. It is focused by the author that in the continuously expanding universe, these fundamental three parameters shall also be considered as **variable**, from time to time. All other parameters such as pressure, temperature, density, force, displacement, gravity, etc related to various discipline shall be considered as **sub-parameters** to the three fundamental parameter in analyzing the structural and functional **characteristics of universe** from time to time.

It is speculated that in the prehistoric time when the magnetic axis was **perfectly aligned** condition, the entire space covering **Inosphere, stratosphere** having very high **refractive** Index, very high **Permeability** and very high **permittivity** of medium. Because of very high refractive index the optic rays of electromagnetic radiation could not be absolutely reach the surface of earth due to distraction and earth was very cold. Because of high permittivity the surface of the earth was much influenced with **electrons** and most of the electric flux are enriched in the upper part of the space.

Because of high **permeability** the surface of Magnetic axis was very much **enriched** with magnetic flux. It is focused that the permeability shall be considered as the character of **Moon** and permittivity shall be considered as the character of **Earth** and Refractive index shall be considered as the character of **Sun**. In

electromagnetic theory these three fundamental parameters are considered equivalent to the three electromagnetic elements.

- i) Permittivity - Capacitor
- ii) Permeability - Inductor
- iii) Refraction - Resistance

Because of high Permeability, high permittivity and high Refraction of Medium in **Prehistoric time** it is speculated that the entire Ino-sphere, strato sphere above the surface of earth is considered completely filled with **OZONE** and filled with **saturated water vapour**. It is hypothesized that during this period there was **no oxygen** evolved. In fact it is speculated by the author that during this period the entire earth might be covered with full of **OZONE Water**. Hence the Prehistoric human while living at **MARS** could subsist with **ozone** breath. Because they are subsisting with Ozone breath they could be able to live under **OZONE WATER** also and they could swim upto the surface of earth. The etymology of **OCEAN** might have been derived from the phonetics of OZONE. Ocean water on the earth is nothing but condensation of ozone at a particular point of magnetic intensity.

Further, due to high permittivity permeability above the surface of earth there was absolutely no **lightning strike** which could have not reached the surface of earth and restricted to only upper level of stratosphere and **MARS**. It is speculated that the prehistoric human were highly **immune to lightning** strike which results in **long life span** and highly immune to various disease and **cancer** growth. It is also speculated that because of **ozone breath** the prehistoric human blood might be highly **acidic and blue** colour (**PH value below 7.0**).

In **Modern time** because of slight deviation in **Magnetic alignment axis** it is speculated that Refraction, Permeability, Permittivity of surface above Earth varied compared to Prehistoric time. The permeability and permitivity become **very low** and Refraction also become **very low** compared to prehistoric time.

Because of low refraction most of electromagnetic rays could reach the surface of earth and the **photon** density might be very much influenced. Because of very low permeability the magnetic density region above earth might be very much reduced. The low permeability might lead to tremendous reduction **Ozone Layer** and increase in level **Oxygen** was evolved from Ozone. Further the saturated water vapour level (Ozone Water) might be reduced gradually and finally gone down below the surface of earth in modern time. It is further speculated that the **low permeability** of media have paved way for evolution of **modern human with 46 chromosome in modern time**.

It is hypothesized that because the ozone level was very much reduced, the prehistoric human subsisting with ozone breath might have been **extinct** and switch over to **oxygen breath** and become **Modern human**. Because of switch over to oxygen breath the blood of modern human become more alkalic (**PH Value above 7.0**) and lost all immunity against **various disease including cancer**. Further it can be focused that the prehistoric human were highly **anti-oxidant** and Modern human are highly **oxidant**.

Further due to low permittivity above surface of earth, the electrons become feeble and the Earth is subject to **More lightning** strikes and volcanic lightning volcanic activity etc in **modern time**. Hence the severe climatic change may be due to **misalignment in magnetic axis** and reduction in permeability and permittivity rather than increase in CO<sub>2</sub> Level in the modern time. Further because of low refractive Index above the surface of earth the light rays of Electromagnetic radiation might be largely entered in the atmospheric region and **photons** are highly influenced. It is speculated that due to consistent decrease in Refraction Index of Medium it is hypothesized that there may be more light rays reach the Earth by **2100 AD** which may result further increase in temperature level. Due to gradual decrease in permeability of medium there may be the possibility of zero level ozone layer at one stage which may result in **total loss of magnetic field** in the magnetic axis connecting Moon and Earth. It is hypothesized by the author that consistent reduction permeability of medium may be the cause for increase in CO<sub>2</sub> level and reduction in **Ozone** layer level rather than **Induced human act**.

### Source of Electromagnetic radiation?

It is focused by the author that the **SUN** shall not be considered as the source of electromagnetic radiation Sun shall be considered as one of the pillars of **base** of cosmo universe. **COSMO** (Darkflame) shall be considered as the source of electromagnetic radiation which is considered located very far above from **Sun, Earth and Moon**.

The origin of EMR shall be considered as the Upper layer of **Region III Vacuum** where EMR shall be considered as originated due to **freezing** of three fundamental **NEUTRINOS (PHOTON, ELECTRON, PROTON)**. The freezing point shall be considered as the **starting point** layer of **Material Universe** where all matter do consider exists including all matters, and all planets including **MARS**, all life organisms. It is focused that the upper two regions of vacuum shall be considered consists of full of **Neutrinos** and **Antineutrinos**. The whole cosmo universe shall be considered look like a closed **TRIPOD PYRAMID** and the Dark Flame (Cosmo) shall be considered as the **centromere** and **ORIGIN** of **Cosmo Universe**.

It is hypothesized by the author, in the Material universe, every matter shall be considered having their own **Refractive Index**. It is focused that every planet including **MARS** and **COMETS, ASTEROIDS**, etc. has their own colour due to its **specific refractive index**. The specific refractive index shall be considered equivalent to the **Mobile Number** of **MASTER BTS**, which radiates **Billions** of colour in the electromagnetic spectrum emanated as **Electromagnetic radiation** in the region of Material Universe.

Further the existing Neutrinos, Anti neutrinos shall also be considered as having their own colour due to **DARK RADIATION** of Cosmo Flame. If so what is the colour of Cosmo Flame? It is hypothesized by the author that the colour of Cosmo Flame shall be considered as **DARK BLACK**. Further the Cosmo Flame shall be considered as **Highly Cold Flame** rather than **Hot Flame**.

Further during the course of continual expansion of universe, each **Organism** including **Microbes** shall also be considered as having their own **Refractive Index** and reflecting their own colour. It is hypothesized by the author that the first organism 3 Chromosome Human when lived in **MARS** in Prehistoric

time might also have their own **Refractive Index**. It is focused by the author that the **colour of Prehistoric human** shall be considered as **absolute black**. It is focused that when they lived in **MARS** they might have well versed with Astronomical laws and formulated the philosophy of **STAR** with three **TINY DOTS**. Because of extraordinary wisdom the three chromosome human shall be called as **SUPER SCIENTIST** having different genetic characteristics. It is focused that the word **chromosome** shall mean one ray in Billions of rays in the **electromagnetic spectrum**. In other words, it can be said that in the electromagnetic spectrum billions of organisms with different chromosome level shall be considered as having different colour which shall be considered equivalent to **Mobile Number** of that organism.

Further, it is speculated by the author that when the **magnetic axis** was perfectly aligned there might not be existence of **Earth gravity** in the Prehistoric time. Hence the prehistoric human populations while living in **MARS** might have conducted **picnic tour** from **MARS** to Earth and Earth to Mars. It is focused that the etymology of word **MARS, Marshland, Marsh gas** might be derived from Prehistoric Tamil Phonetics **Mari, Marudam**. Mari means **Rain**, Marudam means **Clay Soil**.

During **modern period** when there was a considerable deviation and **misalignment** to magnetic axis due to low permeability, low permittivity of Medium the **Earth Gravity** might be formed and **more oxygen** might be generated from ozone layer. The tilted magnetic axis of earth, and deviation in axis of Earth may be due to formation of Earth Gravity in Modern period. Case study shows that there is a reversal Magnetic poles once in thousands of years. It is hypothesized by the author the poles of magnetic axis connecting Earth and Moon never be changed, only the intensity of Magnetic Field gets reduced gradually until **Zero Point** occurs.

The prehistoric populations (Superscientists) while living in **MARS**, they might have called Mother as **Ammu**. The etymology of word **Mum, Amah**, might be derived from Prehistoric Tamil Phonetics **Ammu**. Ammu shall mean **Ruler of MARS**.

- Author.

## Conclusion

It is speculated that in the universal family the **child** is considered as going away from **mother** and hence the mother is **heated up**. In **Astronomical** term, it shall be understood that **Moon** is going away from Earth and hence **Earth gets warmed** and it is understood as **GLOBAL WARMING**. The **SHUMANN RESONANCE Mayan Calender** predicted the **ZERO POINT** of earth occurs by **2012 AD**. But it is speculated that the Prehistoric Tamil Populations already estimated that the **Zero point** shall occur by **3000 AD** when all magnetic field be absolutely lost and the magnetic axis may likely to be broken down.

(a)

(b)

It is focused that in the early universe the magnetic axis was perfectly aligned. Subsequently there was tilt of earth axis rotation and tilt of magnetic axis due to the reason that the moon is going away during the course of time. Further in the expanding universe, various matters evolved shall be considered as three generation of matters existing in three different regions.

It is focused that the three area of electro magnetic spectrum might have been formed gradually in phased manner due to consistent decrease in permeability. During prehistoric time there might not be existence of visible, infrared spectrum rays and there might be existence of only ultraviolet region in the upper part of space. Subsequently visible and infrared spectrum might have been formed during modern time.

It is speculated that when prehistoric human lived in MARS there might not be any existence of visible, infrared spectrum and might be exposed to only ultraviolet spectrum and hence viewed like bluish body due to ultraviolet rays exposure. It is speculated that the colour of MARS might be highly blue in colour when prehistoric human were living in MARS and subsequently might be changed to red colour during modern time after the birth of visible and infrared spectrum.

**Dark flame is the centromere of universe. Dark matter never dies. It neither be created nor destroyed. But it can be transformed from one form to other form within three region.**

## ---- Super Scientists of MARS NAD (Maruda nadu)

### What does mean Twinkle Stars!

It is hypothesized by the author that the so called Twinkle Stars shall be considered as the charged particles of Neutrinos and Anti-Neutrinos existing in the Region 2 and Region 1 of universe, i.e. the Billions and Billions of twinkling objectives above the far sky shall be considered as our ancestors and other life and non-life matters exists in the **charged particle form** having their own colour identity in the electromagnetic spectral region having billions of colour rays. It can be said in other words, all our ancestors are having their own **Mobile Phone Sim** identity and existing under the **Dark Flame**.

### What does mean planets and mountains!

It is focused that mountains are not only existing on Earth Planet, but also exist in various other planets also. During the course of evolution of universe the evolution of various planets, mountains shall be considered as natural **byproduct** of electromagnetic equilibrium. Every Various biological problems such as various disease like Hypertension, Frustration, High BP, Heart attack, Fast Cancer Growth shall be considered as the **act** of electromagnetic equilibrium due to consistent decrease in permeability of space which results in reduction in ozone level and increase in **CO<sub>2</sub>** Level.

Further the existence of ocean, natural gas, crude oil, coal, coke, sedimentary rock, minerals, etc shall also be considered as byproduct of electromagnetic equilibrium. It is hypothesized that the characteristics, properties of these natural resources shall be considered undergoing **microbial changes** due to gradual decrease in permeability of space. It is hypothesized by the author that there is no worry for shortage of **PETROLEUM DIESEL** products. One day the entire ocean shall become **Petrol/Diesel**. Further all these **byproducts** shall be considered as the products evolved naturally in the expanding universe as a result of **CLIMATE CHANGE**.

### What does mean Temples, Pyramids!

It is focused by the author that the existence of planets, comets, asteroids, mountains shall be considered as the naturally available **CLIMATE CONTROL MECHANISMS**, for keeping the Universe under balanced condition. The existence of **Temples, Pyramids** shall be considered as the **Human made climate control mechanisms** in the prehistoric time based on the philosophy of Prehistoric Tamil Law when people lived in **MARS** who are expert in climate control mechanism principles. It is hypothesized by the author that Temples, Great Pyramids, Monolithic stone structure, huge tower like Ephil Tower, might have been constructed on the earth in the selected **Epic Centre** of earth to counter balance and to protect the damage from frequent **EARTH QUAKE**. Even the **Great wall of China** might also have been constructed as a climate control mechanism and **modern scientists** treat them as **world Wonder**.

## Millions of theories about Universe!

It is hypothesized by the author that **Dark Flame** shall be considered as the centromere of universe, and the structure of universe shall be viewed as **TRIPOD** (Copernical) having **Triangular base** consisting of **Sun, Earth, Moon** existing as foundation of Universe. In the whole universe **EMR** (Electromagnetic radiation) shall be considered as the fundamental matter consists of **Photon, Electron, Proton** as fundamental **Neutrinos**. All the matters of material universe shall be considered as **SPECIES** to the fundamental three Neutrinos. This philosophy has already been formulated in Prehistoric Tamil Law with **three tiny dot** when the Prehistoric populations (superscientists) lived in **MARS**. Based on the existing laws of universe, matters, life, shall be classified under **three** fundamental codal rule.

- i) In physical theory, photon, Electron, Proton shall be considered as three species to **EMR**. All other particles, matters shall be considered as **subspecies** to the three fundamental species.
- ii) In mathematical theory, tripod structure with Triangular base shall be considered as the fundamental mathematical **law**. Various other mathematical laws related to various structures like circle, cone, square, rectangle, Trapezium, Eclipse, etc. can be accommodated within the fundamental structure of **Tripod**.
- iii) In chemical theory carbon, Nitrogen, ozone shall be considered as three species to **Hydrogen** and other millions of chemical elements shall be considered as **subspecies** to the three fundamental species.
- iv) In life theory (**Biological**), three chromosome organism (Prehistoric human) shall be considered as the fundamental Origin of Life and all other organisms with various chromosome level shall be considered as **species and subspecies** to the three chromosome fundamental organism.
- v) In modern physics, optic, Electric, Magnetic theory shall be considered as the three species theory to the fundamental theory of **EMR**. Millions of various other theories shall be considered as Sub species to the three species theory.

Similarly **Dark Flame** shall be considered as the fundamental force, and strong force, Gravitational force, weak force shall be considered as the three species force to the fundamental Dark Flame force. Millions of various other forces shall be considered as **subspecies** force to the three species force.

- vi) The Prehistoric human who lived in **MARS** shall be considered as **SUPERSCIENTIST** and **TESLA, NEWTON, EINSTEIN** shall be considered as three species scientists to the

fundamental Superscientist. Millions of other scientists across the world shall be considered as the **subspecies** scientists to the three species scientists.

**Einstein** (Moon) shall be considered as the right hand,  
**Newton** (Earth) shall be considered as left hand and **Tesla**  
(Sun) shall be considered as Brain to the **Superscientists**.  
- Author

- vii) In electromagnetic spectral colour theory, **BLUE, RED, WHITE** shall be considered as the three species colour to fundamental **BLACK**. Millions of other colours in MER Spectrum shall be considered as **sub species** colour to the three fundamental species colour.
- viii) In human anthropological science, races, **BLUE, RED, GREY** shall be considered as the three species **IRIS** to the fundamental **BLACK Eye Iris**. Millions of human races having different colour of **Iris, Skin, hair** shall be considered as **subspecies**. to the fundamental three species **Iris** colours.

It is hypothesized by the author the prehistoric human Population when lived in **MARS** might be having black Iris, Black skin, Black hair.

### Case study on medical science

The role of permeability variation not only plays in climate change of earth but also has considerable effect on **human life** also. The existence of very high permeability and low permeability of space from prehistoric time to Modern time had much impact on human evolution and various races.

### ABO Blood System

From the existing theory of ABO system of Blood it is hypothesized by the author that ABO system shall be viewed as **AB + O**. It is speculated that the prehistoric human while living in **MARS** might be having **AB** type blood due to high permeability environment and O type might be evolved during modern time in very low permeability environment and evolution of **OXYGEN** from **OZONE**.

The other type of blood A,B, might be evolved during the course of time based on different permeability condition. It is the hypothesis of the author that A,B,O type shall be considered as the **three species** blood to the fundamental blood **AB** type. All other type of blood with varying **Rh factor** shall be considered as the **subspecies** blood to the three fundamental three species blood type. **AB** type considered as **Universal Acceptor**. Further the colour of blood in prehistoric time might be **Dark black** due to very high permeability and become **red** colour in Modern time due to low Permeability. The AB type blood shall be considered containing full of ozone and free from oxygen, in prehistoric time. Further it is speculated that there was no content of **WBC** and WBC might be evolved during modern time in low

permeability situation. In other words, the prehistoric human were highly Immune and they do not require and **WBC** for fighting against foreign substance. It is also speculated that the Prehistoric **AB Type** blood might be highly **Acidic** having **PH** Value below **7.0** due to high permeability situation and modern time **AB** type blood become **Alkalic** having **PH** value above **7.0** due to low permeability situation. The prehistoric human was free from **SKIN Cancer**, due to high influence of **Vitamin D** due to high permeability situation and modern human lacks Vitamin D and hence subject to severe cancer attack due to low permeability situation and higher concentration of **OXYGEN** in the blood.

It is speculated that the Prehistoric human were free gigantic figure due to high secretion of **pituitary** in high permeable situation and size of human get gradually reduced due to lack of pituitary Secretion under variable decreased permeability situation.

Further the prehistoric human were from blood pressure and heart attack due to low metabolism and having considerably low heart beat level (Say **60 pulse** per minute) due to high permeability environment, and liable to High BP and Severe heart attack due to high metabolism and having considerably higher heart beat (say **72 pulse** per minute) due low permeability situation.

**Are super scientists are brainless!**

No... No... the superscientists (Prehistoric human) were highly wise because they are free from **lead** content in the blood due to high permeability environment and modern scientists **wisdom level** might be slightly reduced due to higher level content of **lead** in the blood due to low permeability environment. Because of higher content of lead modern time human populations are subject to severe nervous disorder, memory loss, bone marrow problem, etc.

Further, prehistoric human were free from diabetics due to lower level **insulin** secretion due to high permeability environment. Modern human are subject to severe diabetics due to higher secretion of Insulin due to low permeability situation.

Superscientists were highly **Anti-oxidant** and wise in managing the climatic issues. Modern Scientists are high **oxidant** and have moderate wisdom in Managing Climatic Issues.

The prehistoric human were strong in **genetic value**, due to steady **RNA, DNA**, High **Protein** content due to high permeability environment. It is focused by the author that permeability level play major role in RNA, DNA, Protein Value and any variation in permeability level will seriously affect the RNA, DNA

structure and Protein value. It is focused that as the permeability of space considerably reduced in Modern time and there might be a serious damage in RNA, DNA Structure due to low permeability which results in evolution of various **new blood group** and **various species, races** depending upon the place of living where the permeability level determines the **specific genetic** characteristics of human of particular race.

It is further hypothesised that the Prehistoric human even might be having **SINGLE CHAMBER HEART** during origin with single blood group **AB TYPE** due to very high permeability environment. The birth of Auricle and Ventricle might have been necessitated subsequently under low level permeability environment and switch over from ozone breath to oxygen breath.

Superscientists have single chamber heart and highly wise in Managing the climatic control issues. Modern Scientists have four chamber heart and little degraded wisdom in managing the climatic control issues.

- Author.

IJSER

## Origin of Life hypothesis

As far as concerned about origin of life **Biologists** reason that all living organisms on the earth must share a **single last Universal Ancestor** and propose two major hypothesis on origin of Life. It is focused by the author that the following hypothesis are made by the author on origin of Life.

1. First life originated in MARS have **AB**.type blood and Ozone breath.
2. The first life might be **spontaneously** evolved by Electromagnetic radiation (EMR).
3. The prehistoric life was **seeded** to earth from MARS at later date.
4. The Prehistoric human when lived in MARS formulated **three domain** of life with **three tiny dots**. Further the colour of three domain might be due to variation in **permeability level** when the three life originated.

- a) Bacteria - **Blue**
- b) Archaea - **Green**
- c) Eukaryotes - **Red**

It is focused that the **Genetic divergence** of various life might have been accounted depends upon variable **permeability level** during the course of time.

### What does mean Missing Link!

The Prehistoric human population who lived in **MARS** shall be considered as the **Seed Link** of human populations of **earth**. It is hypothesized that during the course of continuous expansion of Universe the prehistoric human population who subsists with **OZONE** Breath could be gradually **extinct** when ozone level was reduced considerably and **oxygen become dominant**. Hence the human population might switch over to oxygen breath by **Natural Selection** and become **SEED AND LINK LINEAGE** to the oxygen breath populations.

**MY**

# LORD.... GOD.... NATURE...

(A Tribute to the superscientist of **MARS**)

Good Morning... **My Lord**  
Some believe... I am **created**;  
Some believe... I am **evolved**;  
None can deny...You are **radiating**;  
You are not enemy to **Darwin Sir**

You created me from your... **single chamber Heart**  
But I am evolved into... **Four Chamber Heart**  
Comfort me with your... **Radiation**  
Enrich me with your... **Photon, Electron, Proton**

**Photon** is your... Redeem  
**Electron** is your... Mercy  
**Proton** is your... Love  
**EMR** is your... Blood  
You are the... three-in-one **Nature**

You are the **Superlink**...  
You are the **Superscientist**...  
You are the **Supernature** linking Life Matter and  
Non-life matter

You are the Dark flame of... **Universe**  
My ancestors are like glowing... **Neutrinos**  
I am not **orphan**... Still in material universe  
I am going away from... **your axis**  
I do not know the... **reason**

Lead me with your... **reflectivity**  
Feed me with your... **permittivity**  
Strengthen me with your... **permeability**

**Goodnight My Lord... Wake me up tomorrow...**
