

Dream Trend – Sex Tourism

Path to Explore the Secrets of Love

SuhasRajaguru – PGDM International Tourism Business

Abstract - Sex tourism is one of the world's most controversial Trend. While it contribute enormous revenue by condemning the two main issues - trafficking of women and children exist. Despite this, little research has examined the motivation of sex tourists. The purpose of writing this Paper is to develop an understanding of the sex tourism phenomenon and, more specifically, to explore actual concept of sex Tourism by defeating the myths about it in the industry.

Index Terms- Conceptualization, Orientation, Knowledge, **Education**, Facts Myths About sex tourism

1 Introduction

Sex tourism is one of the world's most controversial Trend. While it contribute enormous revenue by condemning the two main issues - trafficking of women and children exist. Despite this, little research has examined the motivation of sex tourists. The purpose of writing this Paper is to develop an understanding of the sex tourism phenomenon and, more specifically, to explore actual concept of sex Tourism by defeating the myths about it in the industry.

Two key propositions addressed

- (1) The Industry level of Understanding the concept relates to acceptance of trend in industry;
- (2) The Tourists level of Understanding with the concept of modernity relates to the impacts in the modern society by participation in sex tourism activity.

Tourism has been fast growing industry especially after the invention of jet airplanes in the 1960s. People are able to travel around the world in a matter of hours. The World Tourism Organization (WTO) forecasts world international arrivals will reach 1.56 billion in 2020 with Asia Pacific having the second highest number of arrivals, approximately 397 million tourists (WTO, 2005).

Sex tourism exists in most part of the world (Thailand, Netherland, Portugal, Costa Rica, Vietnam, Kenya....) in spite of being illegal. It is certainly not a new industry and has been increasingly and rapidly flourishing within recent years. People are amazed when traveling to Amsterdam,

prostitutes from the streets, 24 hours a day. Prostitution is officially permitted in Amsterdam. Nonetheless, prostitution is illegal in many countries, including Thailand. Surprisingly, even though it is not legal, tourists and locals have been actively involved in the prostitution business every day.

In many countries, sex tourism is a fast growing industry similar to the tourism industry itself. However, while it obviously brings in huge revenues to a destination, sex tourism also degrades country reputation, position and impacts on its culture at the same time. Although most people have heard of sex tourism, not many can differentiate normal tourists from sex Concerned tourists. The broad nature of the term "sex tourist" can be defined; "anyone who is open to and desires for opportunities for sexual contacts or sex knowledge" can be considered as a sex concerned tourist. Often times, it is awkward for a person to declare oneself as a sex-concerned tourist because sex tourism is still both illegal and immoral in many countries.

Sex Tourism has been systematically tined by many academics researching within the orbit of sex tourism that to define / understand the happening which is in short of impossible. Ryan and Hall (2001) recommends that to define it simple as any tourist excursion where the primary motivation of the trip is to have sexual relations with somebody is an oversimplification of a very complex interact.

O'Connell Davidson takes out motivation from the definition, insist that we might conceptualize sex tourism as the activity of individuals who 'use their economic power to attain powers of sexual command over local women, men and/or children while travelling' (1998: 75). In different areas of the world – and sex tourism in its multitudinous forms takes place globally – there are very different trends and patterns in the types of sex tourism that go on.

where local men and tourists can simply "window-shop"

2 Happening Concept of Sex Tourism

Sex tourism is "Secret of Love". Facts & definition says that involving with the prostitute to experience the love secrets is what sex Tourism. Actually the perceptions of market, Tourists, stakeholders, have the same thoughts with the new trend. But this is a "myth" same as Hinduism explains about the existence of God & Demon with some beautiful & creative stories, to demonstrate the super power. There are some other activities which sex tourism market is not focusing; Shopping, concerning sex therapist, different sex culture study... they are the keys for sexual knowledge hub & learning many chapters of Tourism associated sex.

To predict about the travelers, women are never themselves sex concerned tourists. But if the industry focus on Caribbean region it is change – ringing for the predictions, whereas majority is heterosexual relations between male sex tourists and female sex workers,

There is also healthy involvement of European & North American young males. (Herold, Garcia and DeMoya 2001; Phillips 1999; O'Connell Davidson and Sanchez Taylor 1999).

On the global sex tourism Platform, case of male sex tourists engaging with male sex workers are not remarkable either. Filtration into gay sex tourism in Europe such as Bunzl's ethnographic study of middle-aged Austrian males visitant Prague to have sex with younger male prostitutes, paints a picture of an active European gay sex tourism scene. Along with this, various Caribbean countries such as the Dominican Republic, Sint Maarten and Curaçao are known to legion gay sexual encounters between sex workers and tourists (DeMoya and Garcia 1999; Martis 1999).

3 Sex Tourism Positioning

It is be like worth the mention of a few instances of the colonial histories of the Caribbean and Southeast Asia. For illustration, the transatlantic slave trade and boosting grip that came to specify the Caribbean for Europe for the duration of the British Empire's expansion; or the use of Southeast Asian countries as the war - zone between the Japanese military and World War II allied forces. With histories so intertwined with European and North American imperial efforts, the Caribbean and Southeast Asia are well suited as examples in a discussion of how sex tourism. In such a short span, it would be even to entertain the idea that a consideration of how the very heterogeneous notion of sex tourism plays itself out in its disparate theory in these areas of the globe.

Further curb must be set in terms of the *type* of sex tourism taking place in these geographical areas that will be countered here.

My concerned focus can only meet the Education / Patronage the Sex tourism Components *To be restricted to simplify the way of understanding.

As per many Tourism ghettos Sex Tourism is exploitation of women & children, the above arguments have an evidence for the same, no man want to witness the women exploitation in the industry, there is communication gap in market of sex tourism; sex tourism is hidden pearl in the industry no one is ready to promote or create awareness about the facts associated with the sex tourism and the tourists are lacking to access the proper service & activity, so they are just going beyond the border of principles In Tourism Industry. If industry explores the existence of pearl in market than I am sure that, the ghettos can get the answers for their arguments. The exploitation can be removed by framing a policies, norms & principles for sex tourism considering the social aspects. Which helps to sustain the dream trend in industry similarly changes can leads to convert the negative thoughts of tourists about the Dream Trend.

4 Wrong perceptions

Child & Sex Tourism

Their playground is the brothel; they are the playthings and toys of lust. India reportedly has the world's largest concentration of child prostitutes, accounting for 1 in every 4 of the global number. India's children are no strangers to exploitation, but none of it is as brutish as the terror to which these particularly unfortunate children have been subjected. Raped at 10, tortured and starved into submission at 11, abortion at 12 and sexually violated 10 times a day till AIDS throws them onto the streets.

Why this is so, should we entertain the Sex tourism or argue with the facts...?

Centers of rest, relaxation and pleasure resorts to meet the wishes of the Western propertyed. Such activity is given the name of tourism, and for the occasion will be built up as a national industry... The casinos of Havana and of Mexico, the beaches of Rio, the little Brazilian and Mexican girls, the half-breed thirteen-year-olds, the ports of Acapulco and Copacabana – all these are the shame of this depravation of

the national middle class ...will have nothing better to do

than to take on the role of manager for Western enterprise, and it will in practice set up its country as the brothel.

5 Motivational Drivers Of Sex Tourism

Mixtures of tourism resources are utilized to find the better way to understand the concept of sex Tourism. Sex tourists were pushed by two main motivational drives: physical & psychological needs which came together as personal needs.

Psychological Needs-

- Hedonistic Drive, Modernity
- Sense of Belonging, Freedom, Excitement

Physical Needs-

- Physical Problems, Unmet Sexual Needs
- Tangible attributes

Physical Needs – Drivers like physical problems, unmet needs & tangible attributes can be pushed to involve in the Sex concerned activities. To be more practical the mentions / examples are right enough to prove the theory of Sex tourism, but to get satisfied by hurting the ethics of industry is not the way to success. I believe these intentions will not lead to ultimate result instead it is time being solution.

Psychological Needs – Modernity, belonging, excitement & freedom misleads to unexpected happenings with sexual encounters. Everyone's individual thought is to explore the different dynamics of sex. Certainly the path to exploitation*unseen.

Yes, there is a way out to influencing factors. Which can be diverted to find the ultimate solution by sexual education

The belief should be altered only with the Education, if Tourism industry awakes the Tourists, exploitation can be restricted.

CONCLUSION

Sex Tourism has victimized more than 2 Million human beings as per the study conducted by UN. Solution for such hammering study do not have any border to conclude. But results can be predicted & controlled.

Sex tourism is also leading to breach of human rights & Freedom. It counters mental disorders like suicide, abuse, addict & depression.

There are other way to divert the result of motivational drivers. Find the path by solving the puzzle of exploitation. Although the legislative policy found to be good, enough to secure the industrial practices in international level but the borders of sex tourism is epidemic.

With great effect of “**operation predator**” which has preventive measures for international analysis, further handover with regard to every individual foreign body participation in the practices of sex tourism.

A united analysis of practices considered to provision sex tourism.

Acknowledgement

It has been great effort for me to study this project; however, it would be incomplete with many individuals. Wholeheartedly I would extend my sincere thanks to all of them.

I believe this is great opportunity to appreciate the gratitude of **Asst. Prof. Mahesh R Nayak, IITTM**. Who supported me to solve every puzzle associated with **Sex tourism is deep way to the Truth**. I am very thankful to his guidance & advice.

My appreciations also go to **Mr. Vinu Vijay, Mr. Sachin C & Mr. kapilJadhav** for assisting me to study more on the project by providing different waves to the subject with enormous ideas to express my content.
