

Life After Death, A True Incident

Abul Kalam Azad

Abstract— Life after death, a true incident. Let us try to understand, we know that, by the big bang starting, move of time started and it is the main time. A lot of move created by creating galaxies, solar systems, planets and stars which are moving and revolving on its own axis depending on parameter k value which i have already discussed in my another research paper. That means different times are running on this universe with different speed. The speed of time not fixed, it is variable on varying places. Now i want to say that, suppose, in a certain moment i am 5 years old and my father is 35 years old and i want to travel by a spaceship for 5 years and started the travelling. After finishing my travel i will return to my father on earth. What change will be made? For example, one year space travel is equal to 10 years passing on earth. The age of my father will be 85 and my age will be remain almost same or about one year increasing as in a state of high speed travelling loss of physical structure grow less. Now the magic is i am a little boy and my father is very old man. Then to me it is understandable that i am in future and to my father, it is understandable that he is in the past. In this way, If i increase my space travelling time more 5 years and returned to earth, i have found my father no more actually no relatives found more. I will feel me alone on earth with other unknown environment. In the above way, i want to say that, after death our soul start their travel only and they reach on a unknown place of high order of technological advancement of regenerating physical structure. So, now for each person after death, time travel or space travel will be occurred by maintaining the same proportion of difference of age on earth. Every soul must travel time or space by the procedure of death. Actually death is the procedure of starting the travel. Travelling with great speed is a magic as many unknown things can be found. Such as, if me and my friend are in Dhaka now. I am travelling by air plane from dhaka to chittagong. My friend disappeared from me and i found some new. It is because of using more speed of time. Actually every thing are hidden by the cover of time. Thus, life after death is very possible.

Index Terms— Life after Death, Hashor, Heaven and Hell, Rewarding, Judgement Day

1 INTRODUCTION

The Earth is full of more than 600 crore people. Everyday new baby are borning and some are dying. The whole management of living, teaching, earning, administrating etc are going on. No one is aware about dying. No research are taken place regard what happen after die. A question of knowing what is creator derive me to find what happened after death scientifically as i am a student of science. Beside this, the things which inspired me more to find out the circumstances after death is peace spreading on earth by come together to understand that dying is not the end word, after dying something more are waiting for us as we can see that various crimes are continuing. If the criminals understand truly that after death we will be regenerated and evaluated, i think every kinds of criminal activities will be disappeared from earth. Peace is spreading and golden days return back.

2 BACKGROUND

- Abul Kalam Azad is currently pursuing IT profession and research and completed B.Sc Engineering In Computer Science and Engineering In 2004.
- E-mail: abul99728@gmail.com

The religion is the thing which is being contained by action. We know that, the prime reason behind at least one of the

Wars happened in the history of earth is this religion. The purpose of this writing is to establish peace by stopping war on earth. We who are educated and wise, surely we are science obeying, this is why this scientific research of mine. If **we together can contain science** in our mind then all problems will be solved by **itself alone**. It is my demand as a student of science.

3 RESULT

What is soul and how it is travelling? As the creator is light (foton atom) and everything is created from light i want to say that foton existed behind every element. Like, if you breake a material, electron, proton and neutron can be found. Further breaking derive you to find foton and further foton or less than foton atom can be found. That means foton is the main thing behind the structure of everything. According to holy quran human are made from soil. Regarding this to me scientifically it is such like that the soul which is created from light special kind with inducing force is projected on soil and structure of first man is created with best intelligence. Then create woman and then their children from them and so on. Now when this man and woman and every living things die the soul exited and traverse on this space like light or more than the speed of light. It is traversing on space with time and it is time travelling. And reaching on unknown place again projecting on soil. This unknown place is parallel world running with current world. It is i think only. Practical result can not be found by the modern science currently.

4 METHODOLOGY

I have used qualitative methods to gather information of knowing of various text, video and audio documents.

5 CONCLUSION

Actually we are created for infinite time, our age length of time is infinite, death is the transitional point only. Like day and night. Day+Night=24 hours, Current Life+Post Life= Infinite Time. When our body will be regenerated, then it comes a question of evaluating depending on good and bad acts by observing memory records. After evaluating, it comes a question of rewarding and assigning facilities which is similar to the proportion of earth life. And this starting travel to assigning facilities procedure is very speedy according to time of earth and it is very slow according to the time of unknown place. To the earth man it is so fast going, evaluating and assigning and to the unknown place man it is very slow going. Like one day in unknown place is equal to the grand total passing time of the earth. For more clearing, suppose two friends are standing in the middle of circular airport located at tekna. They are in a bet that, one is using fighter plane to go tetulia from tekna by 5 minutes and the other friend will cross the circle by this 5 minutes with walking and a phone set is kept on tetulia and a phone set kept on standing friend's hand. The purpose is to talk and observing what happened after 5 minutes. Start the race and standing friend thought that what a speed of the flying friend !. But flying friend thought that reaching by 5 minutes is so much slow and he can reach there by 3 minutes. He increases his speed by 2 minutes to recovery of slowness. He reached by 3 minutes and call to his friend standing. It can be found that standing friend still walking and require more 2 minutes. Flying friend have to wait for two minutes and he thought that his friend is taking $5+2=7$ minutes passing in equivalence of his 5 minutes. Standing friend tells him that he takes 5 minutes and flying friend says him that he(standing) takes 7 minutes. Now both are true and believing and obeying each other. The flying friend found that his calculated 7 minutes is **5 minutes** which is little treating and standing friend found that his calculated 5 minutes is actually **7 minutes** which is bigger treating. This **7 minutes** is the grand total passing time of earth and this **5 minutes** is the above one day.

It is as though, at unknown place each person will feel that they are in a wait like above and have spent very little time on earth. Earth people will feel that super faster travelling implemented and they are in a magic of time of how flowing. Extreme travel with extreme time speed from one place truly make effect on time flow of that place extremely.

ACKNOWLEDGMENT

THE AUTHOR WISH TO THANK THE EDUCATION SYSTEM OF BANGLADESH.
