

Logical Non-curious Skin Theory for Regeneration, Reconstruction of Skin by Knowing its Bio-physics (Aesthetic Surgery, Anti-ageing).

Satish yerra.

Abstract - The logical non curious idea of regeneration of skins by reapplying logic not curiosity can be done by just balancing 70%waters(positive, cold) and oils30%(negative, warm) with a neutral medium like 7%nitrogen gas injection or nitrogen spray in a right temperature balancing amount. This type of natural reconstruction of face or any part can be done by injecting, radiation method for natural image. The aim is to naturally moisturize inner skin (by referring global moisturization) remove ageing disorders stop, slow down, or occasionally restart skin ageing.

Index terms - Introduction, theoretical explanation, existing techniques, research contribution, results, conclusion, Future scope, references.

1. INTRODUTION - The logical (non curious) idea of regeneration of skins by reapplying logic not curiosity can be done by just balancing 70% waters and 30%oils in a right balance amount with a neutral medium like nitrogen gas injection, nitrogen spray etc. This type of reconstruction of face or any part can be done by injecting method for perfect image. Skin is a largest and important organ and it is very necessary to understand the logic, bio physics of skin. The aim of the theory is not to work on curiosity but to reapply logic that redefines that skin doesn't work on complicated method. It works on logic. This research contains no detail skin research it is psychology, psychotherapy, common logic and bio physics of skin organ. The aim is to moisturize inner skin remove ageing disorders (sebum) by sebaceous glands (by referring global moisturization) and slow down, stop or occasionally restart skin ageing.

2. THEROTICAL EXPLANATION -

2.1. Skin theory

- 1) Psychologically skin can be defined as a cloth of a body i.e. a neutral medium which needs waters(positive) and oils (negative) in a logical amount such that the positive is more than negative.
- 2) E.g. 70% waters, 30% oils, 7 % nitrogen neutral energy which results into naturally moisturized skins.

{The consideration of positive and negative is not according to valency it is only for understanding bio-physics.}

Water (H₂O) logic – why water is said to be life because it contains more positive than negative e.g.

2atoms of hydrogen (positive) 1 atom of oxygen (negative) this atomic ratio is in 70% positive and 30% negative atoms (70:30) form

Fig. 1 Saturated Fat

C5 H12 saturated fat or oil the ratio of oil is 70:30 here positive atom hydrogen is 70% and negative atom carbon is 30%

Nitrogen (2,5) comes between carbon(2,4) and oxygen (2,6) acts as neutral energy.

Usage of neutral energy must not exceed negative energy i.e. must be less than 30%.

2.2 Global moisturization

Considering the example of earth the 70% water and 30 % land and why there is existence of life here ???

The global moisturization of earth depends on bio physical temperature balance of positive and negative (atoms) energy the 30% land is form of oil

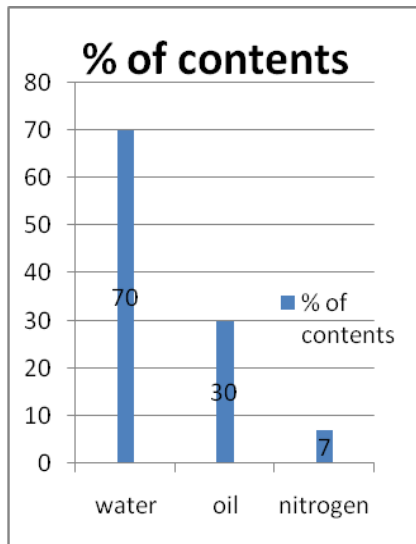

[****The concepts written in bracket are subconscious thinking optional]

[**** earths water surface uses Nacl a type of salt to maintain the temperature of waters i.e. formation of nacl is to maintain the temp of water according to 70:30 logic temp]

[****earth land surface(oil) uses magnetic powders to maintain its temperature of oil according to 70:30 logic]

Element	category	ratio
Hydrogen atomic no. (1)	positive	70%
Nitrogen atomic no. (2,5)	neutral	7 % (approx between 5 to 10%)
Oxygen, carbon atomic no. (2,6) (2,4) . respectively.	negative	30%

Table of no. and percent of contents required for moisturization according to bio physics of moisturization

3. EXISTING TECHNIQUE -

Botulinum toxin is a (not natural for skin) protein i.e. a neutral medium(energy) which balances ageing disorders what this means you have added extra skin cells on your face which balances the existing ageing disorders into a smooth skin by balancing waters and oils.

Demerits – it will enlarge your face and still you will be getting ageing disorders i.e. sebum collection above your Botox corrected face.

2.3. Common disorders –

1. Collection of sebum by sebaceous glands which is above your face especially eyebrows, checks, sides of chin, forehead, nose .
2. The sebaceous glands are microscopic glands in the skin that secrete an oily/waxy matter, called sebum i.e. sebum can be defined as unmoisturized skin is a mixture of more oils and less waters
3. inner wrinkles(folds of sebum) are caused due to lack of oils in sebum.

The result of botonium toxin tightening only adjusted (hide) ageing disorders .

4.RESEARCH CONTRIBUTATION -

- 1) The ageing disorders emitted by sebaceous glands (sebum) is due to not naturally moistureised the inner real skin.
- 2) The application of positive and negative energy i.e. waters and oils in a logical manner of 70% 30% ratio to the inner skin will slow down forming aging disorders by sebaceous glands i.e. stop and slow

down ageing (after removing aging disorders)

- 3) In case of skin water is positive(not neutral) protein is neutral oil is negative(essential).
- 4) Application of any one medicated form of water , protein & oil will only hide ageing disorders i.e. it will collect above your skin because it is not moisturization.

4.1.Causes of all common disorders -

- 1) causes of all common disorders are only due to not naturally moisturized skins
- 2) not naturally moisturized skins are due to imbalance, lack or polluted waters and oils

4.2. Psychological understanding and cure –

- 1) Any chemical coming in contact with your skin can not really damage or cure your skin it will only imbalance, lack or pollute waters and oils. In most case it is ultimately imbalance.
- 2) E.g. even an acid is coming in contact will not really damage the temperature will produce heat oils i.e. imbalance of waters and oils

Your skin disorders are not actually your skin but sebum disorders like sebum folds(wrinkles) which is formed above your skin

Sexual habits really has effect on skin it produces heat which in turn produces oils

Why even the nano particle of moisturizer (available now) does not deeply penetrate inside your skin is because it is not moisturization according to bio physics.

Bio physics of moisturization will delete sebum (blackening) by sebaceous glands

Reformation of sebum by sebaceous glands can be done my removing old(sebum folds) ageing disorders

Bio physics of moisturization is the only way which lies in the pattern of moisturization of nature and can result into eternal skins

According to bio physics 70% waters (p) 30% oils(n) with 7% nitrogen gas injection can moisturised your skin not sebum formed above your skin

As we remove our hair we can remove our extra skins (ageing disorders by sebaceous glands) restart the formation & even stop it. Recommendation is not to stop the formation but is to remove your ageing disorders occasionally and can avoid plastic surgery

Anti ageing and restarting it.

Anti ageing does not means turning back your skin organ clock it is balancing and restarting it .

Due to positive more than negative according to bio physics it Restarts your skin’s life time.

5. METHODOLOGY –

5.1. Temperature of waters and oils also depends here is a mathematical explanation of temperature of waters and oils.

Usage of neutral energy must not exceed negative energy i.e. it must be less than 30 %

7% Nitrogen effect table due to

Nitrogen effect is such that 1% is 70 & 30 and equally distributed 3% on both sides but logic is to give more to positive in 70: 30% manner thus resulting into 3+2 = 5(70%) 3-2=1 (30%)

i.e. $70 - 5 = 65$ $30 - 1 = 29$ (refer table)

Therefore due to nitrogen effect 65% will be subtracted from N.A.T. to keep water cool

29% will be added to N.A.T. to keep oil warm.

The result (65%, 29%) will vary if different amount of nitrogen is used.

Maintaining or balancing the temperature of waters and oils is important and it is balanced according to two ratio 65:29 approx logic manner.

Maintaining or balancing the temperature of waters

Natural atmospheric temperature (N.A.T.) = 37°C.

1st ratio of water = 62%.

65% of 37°C

i.e. $65/100 * 37 = 24.05^\circ\text{C}$

The result of water must be cool less than N.A.T.

$37 - 24.05 = 12.95^\circ\text{C}$

Maintaining / balancing the temp of oil.

Natural atmospheric temp = 37°C

ratio of oil = 38%

29 % of 37°C

$29/100 * 37 = 10.73^\circ\text{C}$

The result of oil must be warm more than N.A.T.

$37 + 10.73 = 47.73^\circ\text{C}$

The maintenance of temperature of waters and oil is only for faster moisturization to maintain N.A.T.

Further increasing decreasing of temperature must be done according to 65:29 ratio logic

$12.95 - 24.05 = -11.1^\circ\text{C}$ water cool.

$47.73 + 10.73 = 58.46^\circ\text{C}$ oil warm.

$-11.1 - 24.05 = -35.15^\circ\text{C}$ water cool.

$58.46 + 10.73 = 69.19^\circ\text{C}$ oil warm.

Graph representing temperature of waters and oils maintained according to nitrogen effect and its link.

- 1) Reapplying logic is best way to get rid of ageing disorders
- 2) Injecting method – injecting again waters and oils with or without skin , stem cells will moisturized the inner real skin cells which is only 1 cm thick
- 3) If inner skin is moisturized the other unwanted(common disorder) unmoisturized skin will be completely

dried blackened and can be removed easily as simple as skin peeling.

- 4) Temperature of waters and oils depends waters must be cool and oils must be warm this will fasten the regeneration process.
- 5) For daily moisturization use richness in waters and oils with neutral medium and make moisturizes and apply.

5.2. Injection method –

- 1) Inject waters 70 % and oils 30% recommendation is to first inject water then oils
- 2) Inject nitrogen gas 7% usage of nitrogen is necessary(7% neutral energy is enough) because it is moisturization
- 3) Injection-1 must contain of waters 70% with -35.15°C, or -11.1°C, or 12.95 °C
- 4) Injection-2 must contain of oils 30% with 69.19°C, or 47.73°C, or 58.46°C. respectively.
- 5) Injection-3 is 7% Nitrogen gas injection or Nitrogen spray at normal room temp 37°C

5.3. Radiation method –

- 1) We can use radiation of 70% waters which deeply penetrate in skin at cool temp (e.g. -35.15°C)
- 2) Radiation of oils 30% which deeply penetrate into skin at warm temp(eg.69.19°C)

- 3) Nitrogen gas 7% at normal room temp 37°C nitrogen must deeply penetrate in skin for moisturization

Here radiation will not result into harmful skin problems if moisturization is done in a right way according to bio-physics

*[****Potassium chloride(dichloride) is a type of salt which is a allergen for skin causing skin rash, chromium dioxide is a magnetic powder causes redness to skin]*

http://wiki.answers.com/Q/What_is_potassium_dichloride

<http://www.cdc.gov/niosh/ipcsneng/neng1310.html>

*[****64% potassium chloride causes rashes and rashes are caused due to extreme cold this could be right in maintaining the temp of waters]*

*[****Normally 29% chromium dioxide causes redness and redness is caused due to heat i.e. chromium dioxide may prove right in maintaining the temp of oils]*

*[****Dosage - 64% Potassium chloride and 29%chromium dioxide 7% protein found in pulses]*

The results of injecting and radiation method will blackened the above ageing disorders (outline) and can be removed surgically.

This will restart sebum building by sebaceous glands above building

Results -

- 1) No extra skin (aging disorders) skin.
- 2) Naturally moisturized skins
- 3) Slow aging of skins.
- 4) Naturally texture tone.
- 5) Slimmer nose no extra cheeks i.e. flat face or any part of body

Conclusion –

- 1) Bio physics of moisturization is 70% waters (positive) and 30% oils (negative) (atoms) energy 7% of nitrogen (neutral energy) for surgical method
- 2) In case of skin water is positive (not neutral) protein is neutral, oil is negative.
- 3) Application of any one will only hide ageing disorders
- 4) Skin ageing disorders by sebaceous glands can be stopped or slow down by daily bio physical moisturization of 70% waters(positive) 30%oils (negative) with 7% proteins in a temperature balancing manner.

Future scope –

- 1) This type of method is very simple and useful for current world

Or after removing it we can stop or slow down by bio-physical moisturization of skin.

If right mathematical temperature is not used according to nitrogen effect it will not result into moisturization, i.e . blackening of ageing disorders by sebaceous glands.

- 2) We can make super tight skin by working on this research.
- 3) This is cheap natural method for making equal world.
- 4) Can be done at any age.
- 5) The scope is we can provide a room with radiation of water and oils and nitrogen in a logical manner and temp and moisturize our skin daily
- 6) The removal of skin disorders is actually removing all skin diseases and hence can best for all skin diseases.
- 7) By working on this theory we can make steel tight skin by bio physical moisturization.
