

# Mediums for Gravity

Muhammad Bilal

Abstract---Every force requires medium? How does force communicate or transfer between two objects? Approach to answer these questions by looking similarities in human behavior because our body is composed of matter that exist in this universe hence our behavior reflects the behavior of different bodies in this universe.

Keywords-- gravitational force, light, solar system, light omitting objects, Intensity of light

Firstly question arises that how gravitational force originating from one body passes its information that its goanna attract or repel other body.

Think over it by simplifying or finding similarities in human behavior of attraction. One can attract woman by expression, looking into her eyes, by saying some words or by touching. Expression and looking into eyes uses light as a medium. Expression cannot be transferred from one person to another if there is no light. Saying of words and touching uses matter as medium of communication. So we get results that force of attraction can be transferred from one object to the other by using different mediums.

Applying this concept to solar system. As we know there is vacuum in space, so sun uses light as medium for transferring its force of attraction or gravitational force. Hence we can say that while standing on earth whatever light omitting objects we see has some force of attraction on earth because light is reaching to the earth.

Earth or any other bodies which don't emit light exerts gravitational force to the limit where exist a matter or we can say air.

**Gravitational force exerting on the earth by the sun is directly proportional to the light intensity reaching on the earth.**

Light is a form of energy that transferred from one body to another. Words are power of communication between two people. Force of attraction depends on the power of the words. Different words affect the people differently. Words changes the state of mind and attraction process began similarly light make changes in matter at sub-atomic level and attraction process began.
