**Abstract**—In this paper the application of Soul Sets in Theology is introduced. Based on reference of various Holy Scriptures, a link among some religions is derived. Using that relation, the generalized concept of God is discovered.

**Index Terms**— Soul Set , Positive Soul object, Negative Soul Object, Neutral Soul Object, Virtue Space, Vice Space, Neutral Space, Origin.

## INTRODUCTION

In this paper the application of Soul Sets in Theology is introduced. Based on reference of various Holy Scriptures, a link among some religions is derived. Using that relation, the generalized concept of God is discovered.

**Positive Soul Object:** It is an abstract noun, verb, statement or sentence which represents a human quality that is considered as a virtue by the judgment set of humanbeings.

**Negative Soul Object:** It is an abstract noun, verb, statement or sentence which represents a human quality that is considered as a vice by the judgment set of humanbeings.

**Neutral Soul Object:** It is an abstract noun, verb, statement or sentence which represents a human quality that is considered as neither a virtue nor a vice by the judgment set of humanbeings.

**Virtue Space:** If a soul space consists of only positive soul objects, then that space is known as a virtue space. It is denoted by  $X^+$

**Vice Space:** If a soul space consists of only negative soul objects, then that space is known as a vice space. It is denoted by  $X^-$

**Neutral Space:** If a soul space consists of only neutral soul objects, then that space is known as a neutral space. It is denoted by  $X^0$

**Origin:** Origin or Soul of Universe is the set of all soul objects having full judgment.<sup>[2]</sup>

## GENERALIZED CONCEPT OF GOD

If the concept "God" is unique then the beliefs of religions and the ultimate version of concept "God" are to be considered to generalize it. From the reference of experts in this area<sup>[3]</sup>, it shows that Last incarnation Kalki (Reference: Bhagavatham, Bhavishyath Puranam, Kundapasooktham in Adharavedam), next Budha Maitreya (Reference: Gospel of Budha), Prophet Similar to Mosa (Reference: Thora), Parakletos after Jesus Christ (Reference: Bible) are all same and that is Last Prophet Muhammed (Reference : Qur'an) <sup>[3]</sup>.

Through the above link, a researcher is directed to the Holy Scripture related with Prophet Muhammed /Kalki/ Parakletos/Maitreya to get an ultimate version of the concept "God". In Qur'an, there are 100 names used as names of concept "God". The stem of meaning of those names is soul object having full judgment. If the set of all those soul objects having full judgment is denoted by Soul Set A then A is the generalized concept of God.

**Theorem 1:** Origin O intersects with A.

**Proof:** To prove that Origin intersects with A, It is enough to show that there exist a soul object  $x \in O \cap A$ . Consider a name of God "wadud", The stem of meaning of which is Love (say x) having full judgment. Then  $x \in A$ . It is obvious that Love is a soul object. Since it has full judgment,  $x \in O$ . Hence  $x \in O \cap A$ .

## APPLICATION IN THEOLOGY

- Theorem 1 helps a Devotee to identify the soul objects in A and try to implement in life.
- Theorem 1 helps an Atheist to search the soul objects in him which intersect with A and try to avoid those in life to continue as an Atheist.
- A Blessed<sup>[1]</sup> can be considered as one who implements some positive soul objects in A to full judgment.

## CONCLUSION

In this paper the application of Soul Sets in Theology is introduced by proving Origin intersects with the generalized concept of God. Study on Judgment Set, Soul Relation, Soul Logic and Soul Network are open to the researchers.
