

The Effect of One Divided by Zero is Big Bang

Abul Kalam Azad

Abstract — What is the reason behind big bang happened? before to answer this question let us try to know what is the creator. The creator is energy to whom it is not necessary at all to transform from one state to another (different energy). It is the extreme static circumstances of smallest atom (foton or smaller than **foton** which is greatest or Big O by imagination) of light energy where every kinds of information or knowledge are stored and where time is zero. As a result of extreme static circumstances and extreme timelessness, big bang or move of time is created from the birth of wish of getting move and time. Birth of wish means birth of every kinds of information or knowledge. The first wish is **counting wish** which is created from uncountable state of timelessness by the pressure of static force of **changing timelessness** state which is **numbering** by imagination. That means, information of number system to our sense are also stored there. That means, every information of mathematics are also stored there. It is not only mathematics rather every kinds of information have born by the starting of division mathematics of one by zero which is endless. The information of this division mathematics is also stored there by the association of more state of number to the less such as how much association of one into zero(like, how 15 mango associated into 3 person, 15/3) by the static force and by the logical demand. Logical demand of mathematics is immortal. To me, the continuous running of having infinite force of this quotient and remainder is circular expansion of created heated smoke which was happened at the center point of foton as a result of huge friction. As a result, huge sound was created which is known as big bang, the expansion of which is still running. So I want to say that, The effect of one divided by zero is big bang.

Index Terms— Artificial Intelligence, Big Bang, Theory of Everything, Division Mathematics, Big Number Association on small Number by Force, Knowledge, Birth of Wish, Count Wish is Mathematical Function.

1 INTRODUCTION

Big bang theory is a given scientific theory about the origin of the universe. The any one of many specialty of this theory is on a special moment this universe is created instead of any sequential process. According to this theory, about one thousand and three hundred and seventy five crore year before from today this universe was created from super densed and heated circumstances. Which was started from a ancient point state. In this circumstances, every mater and energy were at in a state of very heat and dense. But there is no similar opinion found among the scientist of physics about what were exist before this state.

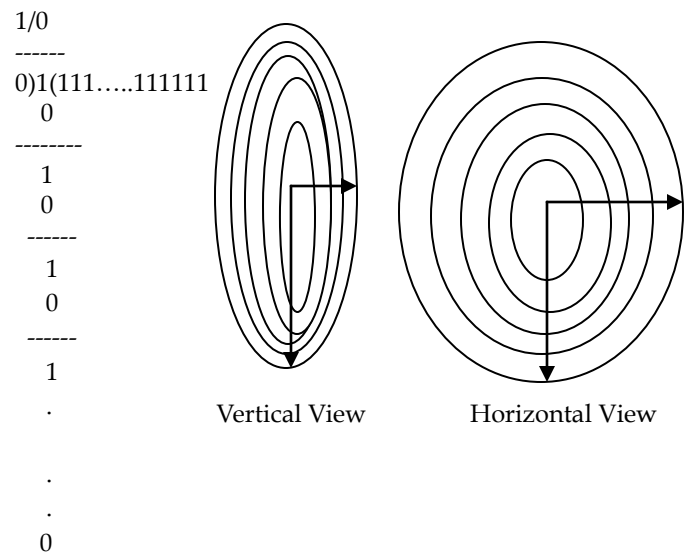

2 BACKGROUND

A question of to know has grown in my mind from the very eagerness of to know the creator that why big bang was happened. I can know from the holy quran that, the creator is special kind of light who knows everything which existed inside and outside of this universe. That means, information can be existed in light and i can know it from various scientific discussion. Such as information transferring on optical fiber, information of starting and stopping TV which existed on the rays of light of remote etc. In that way the creator is also a super big computer compiler of light

of computer **compiler** is to count in that way to me, the first knowledge of the creator also is counting but in a different way. But how, i don't know. From the sense of count, numbers are made and from the number, every kinds of knowledge or information of mathematics are made. By the reason of extreme static force, extreme knowledge or information are made.

3 RESULT

If we implement this division mathematics by computer programming then the same expansion result can be found of expanding vertically and horizontally.

Algorithm

Concat of Subtract per matching to resulting of rest value is greater zero.
1. initialize division result(quotient) by 1 (first multiplication term of

where good, bad, small, big, every kinds of knowledge exist and new knowledge have been made. As the first knowledge

- acceptable value less than or equal to dividend ahead)
- 2. zero(divisor) multiplied by one(division result) then resulting is subtracted from dividend
- 3. with remainder which is greater zero step 2 executed again by each matching of division procedure of first multiplication term of acceptable value less than or equal to dividend ahead.
- 4. and subtracted value concatenating to previous division result.

Java Environment Coding:

consider
dividend=a=1;
divisor=b=0;
division result(quotient)=c=1;

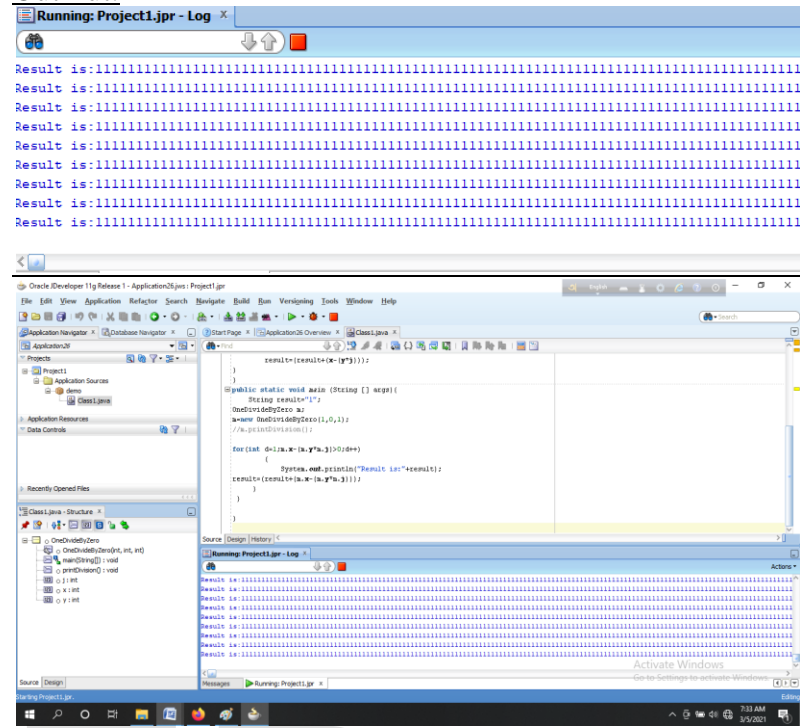

```
class OneDivideByZero{
int x,y,j;

OneDivideByZero(int a,int b,int c){
x=a;
y=b;
j=c;
}
void printDivision(){
String result="";

for(int d=1;x-(y*j)>0;d++)
{
result=(result+(x-(y*j)));
System.out.println("Result is:"+result);
}
}
public static void main (String [] args){
String result="";
OneDivideByZero m;
m=new OneDivideByZero(1,0,1);
//m.printDivision();

for(int d=1;m.x-(m.y*m.j)>0;d++)
{
result=(result+(m.x-(m.y*m.j)));
System.out.println("Result is:"+result);
}
}
}
```

Out Put:

4 METHODOLOGY

I have used qualitative methods to gather information of knowing of various text, video and audio documents.

5 CONCLUSION

Finally, it is to me such like that, the controlling of all of everything with big bang also depends on the value of a constant which can be assigned by allah own or by the understanding power of human and other as a form of parameterized value (Sensing). Like $xay, x=ky, k=x/y$ [expansion stop controlling depends on the value of k, it is uncount wish]. The things which are circular have been created as result of big bang, everything of them are revolving at own axis by depending on the value of this k with different velocity as a result of horizontal force and vertical force and reverse force of them. The value of k may also be zero and negative. There are different move have been created as a result of big bang for which different time have been created. To me, the purpose of human creation is to worship allah and understanding of this time and timelessness and this static forcedness. The continuous knowledge creating by the association of one to zero under static force with the help of matchmathical logical demand is **theory of everything**. Space expanding is the move of time initial.

Total Time, I mean, total move is surrounded by timelessness and staticness of foton.

ACKNOWLEDGMENT

The author wish to thank Soto Jahangir Vai (DDC), Humayune (Friend).
